WHAT'S GOING TO BE the Xmas number one? I know, I know it's far too early, but we journo's are even now asking that question.

This month we've got five contenders, with more on the horizon. Remember though, last year we predicted it would be *Tomb Raider* (and rightfully so), but at the last minute EA stormed in with *FIFA '97*. And how many of you regretted buying that little 'gem'?

First up is our EXCLUSIVE preview of *Tomb Raider 2* – a game that will sell hundreds of thousands of copies and will prove once and for all that the PlayStation is THE dominant format. We've got 50 new screenshots that you will not find elsewhere, plus information about every new feature, costume enemy and level.

To celebrate the forthcoming release of *TR2* we've also dedicated the front and back covers, and even given you a FREE double sided poster in the middle pages of the magazine. Value for money or what?

And you will have also noticed that we have produced a complete solution to the first *Tomb Raider* game, so that if you're a new owner who has not yet experienced the Lara Croft effect, you can complete the game before number two arrives.

Nuclear Strike from EA is another winner in the making, and shaping up to be ten times better than *Soviet Strike*, especially as you can control multiple vehicles instead of just one helicopter.

And then there's Sony's great looking *Rapid Racer*, Capcom's superb *Street Fighter EX Plus* and Psygnosis' *Colony Wars*, which we featured heavily last month and now have a more complete version (which looks fantastic!).

This will be my last issue of *PLAY*, but rest assured the magazine will go from strength to strength as I concentrate on the bigger picture.

SONY US STUDIO DEVELOPS FOR PC!

REVEALED this month is that Sony US's development studio, SISA (Sony Interactive Studios America) has moved away from the core business of the PlayStation and begun to convert PSX games for the PC.

The first games to be converted are *Twisted Metal 2: World Tour* (600,00 sold), *Jet Moto* (500,000 sold) and *Warhawk* (250,000 sold) – all developed by highly respected coders Single Trac (recently bought by GT Interactive).

At the time of going to print however, SISA had no PC publisher confirmed, as both Sony US and Sony Europe did not want to deviate from the PlayStation.

SISA also has two brand new games: *Tanarus* and *EverQuest* on the boil – both are PC network games, so hopes are high that dabbling in this area will mean more multi-player opportunities for the existing PlayStation or PlayStation II.

This is certainly a very interesting move because not only does it show that SISA has great confidence in Single Trac's early releases, but also

that it wants to get into multi-format development, perhaps as a means of funding further development.

Of course this is not the first time that PlayStation games have been converted to the PC, as Psygnosis produced both *Wipeout 2097* and *Formula 1*.

Like the Liverpool based developer, SISA has autonomy from Sony and is free to do what it wants as long as the PlayStation hits keep coming in.

Certainly this is no blow for Sony because it just establishes the brand even further, and means SISA can gradually expand even further using only tried and tested games for conversion. It remains to be seen whether PC owners really want old PlayStation games though.

[ABOVE] *Warhawk* was a great early shoot-'em-up on the PSX – now coming to the PC!

[ABOVE] *Twisted Metal 2* – soon to be on a PC near you and even though it's now getting on a bit, it's still a superbly playable multi-player game.

NOZIN' AROUND

NOZIN' AROUND

Rumours we can't substantiate, whispers of secret projects, general snooping, that's what this regular column is all about - we'll do our utmost to find out all the juicy titbits that the Sony PlayStation has to offer.

Psygnosis has confirmed that *F1 '97* will in fact remain the name for the UK version of the game, and not *Formula 1: World Championship*, which is for the US version only. Many thanks to Psygnosis for informing us.

Hudsonsoft's first PlayStation game will be called *Bloody Roar: Hyper Beast*, and it is a beat-'em-up featuring morphing animal characters.

TOMB RAIDER FOR PLATINUM?

NEW PLATINUM games have just hit the streets, and Sony has also announced that the criteria for games which are eligible to enter the scheme have changed too; opening the way for more recent titles.

Loaded and *Actua Soccer* are the latest games to be sold at the £19.99 price point and will no doubt sell thousands of copies, especially as *Re-Loaded* turned out to be such a disappointment.

Currently there are 15 Platinum games and all have stormed the PlayStation charts upon release, as more and more new owners make the most of budget prices for games which they've never seen before.

Sony has revealed that the Platinum range now accounts for a third of all PSX software sales and it is set to receive even more of a boost now that the time between full release and qualification for the Platinum range has been lowered from 12 to nine months.

This means *Tomb Raider*, for example, could now be a Platinum game just before the second instalment arrives, and we believe this would be a good

move by Eidos. After all, as stated in this month's free *Tomb Raider* solution book, you don't want to play *TR2* until you've completed the first game, and many people would resent paying the full price for a game that is about to be replaced.

To ensure the high quality of the range, Sony has also increased the number of sales needed to secure a Platinum place, from 100,000 to 250,000. Who would like to start betting on some new Platinum games for Christmas then? Do we have 4:3 for *Resident Evil*, 4:1 on *Soviet Strike*, and 2:1 on *Crash Bandicoot*? *Loaded* and *Actua Soccer* are out now, but stay tuned to our Pound Stretcher section (page 96) for even more bargains!

[ABOVE] *Loaded* makes it to the Platinum range, but how many more for Christmas?

PSYGNOSIS: GUILTY OF PIRACY

AMONG the landslide of summer and Autumn releases by Psygnosis comes the light-hearted *Overboard*, a sea-based pirate arcade puzzle game with its tongue stuck firmly in its cheek.

You control a pirate galleon on a quest for treasure and to rid the sea of the scurvy-ridden pirate, Blowfleet. On your travels you'll come across enemy strongholds, ports and shipyards – all shown in a top-down forced perspective 3-D.

Overboard is set across five

specially themed regions with three levels per region, where you can expect to plunder the likes of the Caribbean, Arctic and Middle East.

The game's forté is the multi-player mode, which pits two people on the same stretch of sea (the view pans out when you are far apart) and the idea is to pick up weapon barrels and blow the crap out each other as quickly as possible. This is extremely good fun and Psygnosis could have a hit on its hands come November. Expect a more detailed report soon.

[ABOVE] Check out those background graphics with their excellent attention to detail. Hmm.

[ABOVE] Expect to see huge end-of-level boss in *Overboard*. Better stock up on ammo matey!

[ABOVE] Oh, you have a woman's legs m'lord. I'll bet they've never been sliced clean off etc.

[ABOVE] You'll come across many natural hazards, such as this whirlwind.

[ABOVE] As you can see, the competition for supremacy on the high seas is fierce.

TOP FIVE...

GAMES YOU CAN NOW BUY FOR NEXT TO NOWT!

BUDGET games, they're a wonderful thing, aren't they? And now the Platinum range is in full swing, the chances of you coming across a few PSX bargains is very high. And it's not just mangy old wrestling or platform games either – try this little lot for starters...

1. Alien Trilogy (£19.99)
2. Fade to Black (£19.99)
3. Tekken (£19.99)
4. Need for Speed (£20-25)
5. Street Fighter Alpha 2 (£25)

FFVII – A BARGAIN!

ON A RECENT visit to PLAY magazine, Sony let it be known that although a final release date for Square's *Final Fantasy VII* is not yet confirmed due to a lengthy translation process, the price has now been fixed.

The massive RPG, which we firmly believe will rank as one of the PlayStation's best games comes on three CDs and will retail over here for just £44.99. We have also heard that official *Time Crisis* with its own light gun the Guncon, will be £59.99.

[ABOVE] *Final Fantasy VII* will only be 345 when it arrives here in November. Oh yes.

FIRST BLOOD

GT'S LATEST game to be announced is *Young Blood* which has been developed by Extreme Studios in the States. Based on a comic by fledgling company Image, *Young Blood* is an isometric shoot-'em-up similar in appearance to *Project Overkill*, only with more lush colours.

The game uses the characters from the comic and as you complete levels, each one becomes more experienced and can develop special powers. *Young Blood* has a four player mode which should be excellent fun, as there isn't a decent multi-player *Commando*-style shoot-'em-up on the PSX (apart from *Contra* – Ed). *Young Blood* will be out in the USA in November. Expect a UK release for Christmas or early 1998.

DREDD-FUL NEWS

1979 WAS the year Judge Dredd was introduced to the adolescent population of the UK. For us it was a momentous occasion because at last there was a comic (200AD) and a character with which we could identify. Dredd's "F*ck you" style was unlike anything seen in boys' comics before, and he literally changed the whole scene forever.

One dodgy film and a spin-off magazine later, and Gremlin announces that it has the official Judge Dredd videogame licence. The game was on-show at E3, but only now have we had the chance to play it in any kind of depth.

Basically, *Judge Dredd* is a light gun shoot-'em-up which uses lush rendered backgrounds rather than FMV, although the only things we found to shoot were robots – bogsus! We want perps, jaywalkers, judge killers and skysurfers to blast, not relatives of Metal Micky!

There are 17 levels of action, and the aim is to take down the

renegade judge Royston Bean (tough name) before he reduces the city to anarchy. *Dredd* looks fun, but there are hardly any visual clues that this is a game based on Judge Dredd at all. Could it be that Gremlin has slapped the Dredd licence onto an already developed shoot-'em-up? Surely not.

[ABOVE] *Judge Dredd* from Gremlin is a light gun shoot-'em-up which uses polygon characters and rendered backgrounds.

COLONY WARS – BRILLIANT!

JUST AS PLAY was going to print a more recent version of Psygnosis' space shoot-'em-up arrived and the general conclusion after only a few minutes' play was that it will be one of the games of the year. Words can barely describe the sumptuous colours and subtle shading on the many space cruisers. And as this is a Psygnosis game, the quality of light sourcing and effects is unbelievable.

There will be over 70 missions in the final game, and the presentation throughout is very *Wipeout 2097* – cool and futuristic.

Expect a review of this game soon, but we can already tell that it is going to be huge. There will also be a review of *F1 '97* in issue 26. Cor.

[ABOVE] *Colony Wars* from Psygnosis. It literally took our breath away the first time we saw it. Get saving those pennies folks.

WE DO A LOT OF WORK FOR CHARIDY ACTUALLY

PRINCE'S TRUST CD COMPILATION HITS THE STREETS!

SONY'S LATEST inspired marketing concept is the Power Source demo CD. This is a collection of the PlayStation's best demos, plus some news about Yaroze and the first Yaroze demo – all yours for a deep sea diver (that's a fiver to all you non-cockneys).

But this is no cash-hungry mega-giant snaffling your hard earned for itself, because the proceeds of the Power Source CD are all going to the Prince's Trust charity. Sony hopes to raise £250,000 for the Trust, which aims to help young people, and with so much on offer for only £4.99, every self-respecting PlayStation owner

should add it to his/her collection.

The game demos contained on the disk are explained below, but what's admirable is the sheer value for money factor. Admittedly, the Yaroze demo is very basic, but considering it was not created by an established software company, you can begin to see how home development for the PlayStation will grow as more and more people adopt it.

You also get a sneak preview of some of Sony's up-and-coming releases, which goes to show what a great idea a regular £5 demo disk from Sony would be. How about it?

NOT JUST GAMES!

TO GIVE ADDED

value to the Power Source CD you also get an interview with the guy at Sony who deals with the Yaroze system, in which he explains exactly what you need to set up the system and how much it will cost.

There's also a long video preview of some of Sony's new games in the pipeline; full of fast cuts and a thumping music soundtrack.

And finally, the Prince's Trust sub-menu also gives you some information about the Trust itself and the good work it does, plus a once-in-a-lifetime competition to have your own game idea made into a proper PlayStation release, and win a load of Sony hardware!

[ABOVE] *Snavo* is the first Yaroze-developed game demo. It is very basic and not much fun.

[ABOVE] Apparently, this *Tomb Raider* demo has never been seen before. It's from the first level.

[ABOVE] A great *Destruction Derby 2* demo offers unlimited car carnage on a single circuit.

[ABOVE] *Excalibur 2555AD* gives you *TR* action with more brain taxing problems. Not bad demo.

[ABOVE] The *Exhumed* demo offers plenty of maiming. Worth a look.

[ABOVE] The *Monster Trucks* offering gives you plenty of chances to crush your suspension.

[ABOVE] A new *Porsche* demo offers some driving thrills, but it's still too slow though.

[ABOVE] *Riot* is the futuristic sports game by Psygnosis. The demo is at least playable.

[ABOVE] A bit of an oldie this. *Robotron X* is a 32-bit version of the classic coin-op. Good fun.

[ABOVE] *Spider* creaped onto the UK market with minimum fuss. Try this to see how limiting it is.

BUGGY BOYS!

GREMLIN'S Winter push begins with news of *Buggy*, a radio controlled car racing game which can be best described as *Micro Machines V3* viewed from slightly behind the cars.

These little mental four-wheeled speedsters are perfect for the 16 miniature courses – from beach to castle – and the bouncy gameplay is very reminiscent of the coin-op classic *Buggy Boy*.

Obviously you can stray off the tracks a little, and this means there's plenty of scope for hair-raising jumps and sideways skidding action. Each of the six buggies on offer sit on huge chunky wheels (remember the buggy mode in *Formula 1*?) and they all have different strengths/weaknesses which make them ideal for certain courses.

It goes without saying that because of the real world physics, you can hurl these things around and they will react

just like the real thing (no news on any radio controlled sponsorship or endorsement though) and there is also a wicked two player split screen mode which is top fun.

Like *Micro Machines V3*, the more races you win, the more secret cars become available, and we've heard the likes of dragsters, and a plum red car allegedly made by Satan's little helpers.

Buggy is scheduled for a release at the end of the year and we think it looks jolly good fun.

THE ROAD IS LONG...

FIFA HAS HAD a good run with Electronic Arts. We've had the original *FIFA Soccer* and *FIFA '97* on the PlayStation, and before that countless other FIFA games on everything from the Mega Drive to the 3DO.

But just lately the franchise has suffered at the hands of brand new signings *Soccer '97* and *ISS Pro*, and let's face it, *FIFA '97* stank because although it looked great, the playability had somehow disappeared.

Enter *FIFA: Road to World Cup '98* and the hype begins again, only this time the FIFA team in Canada has taken on some Brits who know a thing or two about the Beautiful Game and so this latest game promises to be the definitive footy sim on PSX.

FIFA: Road to World Cup '98 features 172 teams and the chance to qualify for one of the 32 positions in the World Cup in France. As you can see, the graphics have been beefed up to *ISS Pro* proportions and good old Des Lynam,

Andy Gray and Motty return for commentary duty. We'll have more on this game soon. Let's hope it plays as good as it looks this time.

[ABOVE] Like *ISS Pro* the players are now super-detailed and you get 16 International stadiums to play in.

USA ENTERTAINMENT USA

ENTERTAINMENT USA

CAT BUNCANNON brings you all the news on what's hot in the land of Christian Slater and New York game launches.

Currently the US gaming public are gagging for a conversion of Midway's *San Francisco Rush* after having seen the N64 version at the E3 show. The

game will definitely be coming to the PlayStation, but it is now thought that it will be the start of 1998 for the PSX game, as opposed to November for N64. *SF Rush* is basically an arcade racer, much like *Burning Road*, and you can even smash up the cars so that they are complete wrecks by the time you cross the finish line. The PSX game will feature a two player split screen mode (which the coin-op didn't have) and it looks stunning, but do we really need another racing game?

Gamblers no longer have to get their fix from a seedy backstreet casino because *Caesar's Palace* is coming to the PlayStation, although we haven't heard of a UK publisher as yet (it's Interplay over here). Hustlers can expect to find Roulette, Blackjack, Craps, Baccarat and slot machines – all given the 32-bit makeover. *Caesar's Palace* also includes speech and each game is a digitised photo of the real thing, rather than a polygon environment.

Activision's *Apocalypse*, starring Bruce Willis (as if you didn't know that!) has apparently been delayed until Xmas. We had thought it was going to arrive a couple of months earlier. The delay is said to be because of gameplay difficulties – or perhaps they have seen ASC's *ONE* which looks far better.

Konami has just released the *Lethal Enforcers* double pack here in the States. And yes it's a direct conversion of the 16-bit Super NES games using light guns to pick off jerky digitised opponents who pop up from windows and from behind barrels. Yawn. Now that *Time Crisis* is out, all this stuff looks appalling.

James Cat Buncannon - appears to be the new bullet with a very large plate.

STOP

CODEMASTERS GO ON TOUR!

BUMPER to bumper racing and constant spins, crashes and breath-taking overtaking manoeuvres are what makes BTCC Touring Car racing far more appealing than Formula 1 to the average man on the street.

For a start the cars being raced are variations on the ones you might have in your own drive, and not some million pound single seater. And don't forget that Murray Walker does the commentary, so he's obviously tired of F1 too.

Luckily for us PlayStation owners, Codemasters has acquired the licence to produce an official Touring Car game right from under the noses of the mega-corps, and so we're in for a treat as far as gameplay concerns. As you can see from these exclusive PSX shots, the graphics are *V-Rally* quality, with glowing brake lights, all the right team sponsors, and quite the most realistic looking cars since, well the last time.

You get the choice of joining such teams as Audi, Peugeot, Renault, Nissan, Ford and Honda, and naturally they all perform and look exactly like the real thing. All UK tracks are also perfectly modelled making the game entirely realistic. So far we know there will be many different camera views including in-car, but no news on whether the cars will break apart when they crash. A Workstation soon.

[ABOVE] If you thought *V-Rally* looked good, check out this from Codemasters.

[ABOVE] We are all big fans of Touring Car racing at PLAY, and this is one of our must-haves.

[ABOVE] Every car in the game has been accurately modelled on the real thing.

[ABOVE] The official licence means proper sponsorship stickers, real cars, real drivers, and every UK track has been included in the Codemasters game. We will have a Workstation soon.

ARE YOU CONNECTED?

INTERNET ACCESS GIVES YOU PLAY ON-LINE AND MUCH MORE!

IF YOU'RE SERIOUS

about your PlayStation gaming, in fact gaming in general, then you are probably one of the large percentage of PLAY readers who also has a PC.

Not only does this give you another games medium, but you can also hook it up to the Internet and discover a whole new world of information, reviews and tips. PLAY is of course already on-line, and if you direct your web browser at

<http://www.paragon.co.uk/play>, then you will find an A-Z of every review we've ever done, plus tips, features and even up-to-date information before it gets printed in the magazine. You can even subscribe that way!

But that's just the beginning because there is a wealth of PlayStation-related sites all over the world; many in the USA and Japan, who cover new games and news stories before you will ever see them printed. Need a solution to *Broken Sword*, but you've got no joy from the Sony Powerline? Well, just go to one of

the hundreds of PSX tips pages and you're sure to find it in minutes. And don't forget you can even order games over the Internet. The list of possibilities for a keen PlayStation owner is endless.

We at PLAY use the Internet for checking on release dates, downloading information from company web sites instead of having things posted, and of course seeing what's happening across the pond in all major PSX territories. If you're

connected to e-mail, you can also contact PLAY magazine direct and ask questions.

Remember the *Bushido Blade* instructions offer? Well, there will be more of those, and e-mail users get everything much faster without the worry of things getting lost in the post.

If you're not yet on-line, but want to be, then why not call (0800) 243 777. This is the Surfink freephone number – a company that supplies PLAY with home services and one that we would recommend.

As a special offer to PLAY readers, Surfink is offering a FREE one month trial of its service (which would normally cost you £75) and this gives you access to the Internet, 2MB of web space free, no set-up charges and ISDN at no extra cost. You will also be able to get a speedy modem from Surfink to complete the package. What are you waiting for?

[ABOVE] The PLAY web site offers tips, reviews and so much more! Join us.

IT'S A SIGN!

NEW FROM Take Two Interactive (who has just bought Gametek UK) are two PlayStation titles all due for release soon.

First up is *Dodgem Arena*, a futuristic sports game in a similar vein to *Colliderz* and *Ballblazer Champions*. This plays a lot like ice hockey, only you are controlling floating ships, and there are power-ups to collect which give you a temporary advantage over your opponent. *Dodgem Arena* is set for release at the end of the year.

Sign of the Sun looks to be a point 'n' click adventure (just like *Broken Sword*) where you play astronaut James Mariner, who has been teleported into the sun and trapped by the evil Firons while they prepare to destroy Earth. The developers claim the game will feature three hours of speech and it looks promising. An October release is planned. Both games will be £39.99.

[ABOVE] *Dodgem Arena* is a *Ballblazer*-style futuristic sports game. How original.

[ABOVE] Like *Broken Sword* by Sony, *Sign of the Sun* is a point 'n' click adventure. Looks decent.

GOING FOR A JIMMY...

INTERPLAY'S VR sports label has been a bit quiet since *VR Pool*, but the latest game has been announced as being *Jimmy Johnson's VR Football '98*.

This is an American Football simulator which hopes to beat Electronic Arts' mighty *Madden '98* at its own game, and it is set for a release in November. Not only does the game feature 30 current NFL teams, but also the greatest teams of the Sixties, Seventies and Eighties, and there are even 30 virtual stadiums to visit too.

Jimmy Johnson's features 125 video clips to guide you through the tactics of the sport, and there will be hundreds of different plays, with the option of creating your own. Full review soon.

ALL THE LATEST GAMING NEWS FROM JAPAN –
THE HOME OF THE SONY PLAYSTATION!

D Biggest news this month (apart from the release of *Street Fighter EX Plus* which everyone is going crazy for!) is *Marvel Super Heroes*, also from Capcom. Although this is a 2-D fighting game, the size of the characters is incredible, with some taking up half the screen! It's pretty standard beat-'em-up fare though, with you controlling the likes of Captain America, The Hulk, Iron Man, Spider-Man and Wolverine. You also get X-Men villains such as Dr Strange, Ghost rider, Juggernaut and Magneto. Each character has a strong of special moves, but in an original twist, many are only accessible once you pick up an Infinity Gem. This adds an interesting random factor which means a player who is almost beaten, can suddenly acquire a host of new powers which enable him to turn the fight around. *Marvel Super Heroes* looks like being a perfect coin-op translation, but only a full review copy will confirm whether or not there is any slowdown due to the large sprite size. Full import review soon.

D *GunBullet* is the next game to feature the Namco Guncon, so all you people who have bought, or are thinking of buying, *Time Crisis* can rest assured that Namco does intend to support the light gun. *GunBullet* is an arcade shooting game, very similar to the ones you get at funfairs, where moles pop up and must be shot for points. In fact this game is made up many sub-games to test your marksmanship in different conditions. The idea is that you travel around an island ridding characters of vermin using the Guncon. Hmm, the jury's out on this one so far, but it looks like a laugh...

D And finally this month great news for fans of the classic coin-op, *Arkanoid*. Sony Japan together with Taito has just developed *Arkanoid Returns* for the PlayStation, and it looks like the best version ever, with incredible power-ups, and some new scrolling stages.

THE MASTERS OF THE PLAYSTATION?

RESEMBLING a stylish cross between *Doom* and *Tunnel B1*, industry magnate, Psygnosis heralds yet another new release in the form of *Shadow Master*. This all-action arcade-style game combines frantic blasting action with a dash of puzzle-solving against seven distinctive worlds.

Aficionados of Rodney Matthews, the renowned artist of countless fantasy paintings, will be pleased to note that entire game is based upon his work and thus throws the player into a weird and wonderful futuristic environment.

Your mission is to protect your planet from the dictatorship that's plundering the resources of all the planets in your system. Along the way, you'll do battle with all kinds of unsavoury creatures including: spiders, triffids and dragons. Initial impressions of the game are promising. The backgrounds are highly detailed, and the accompanying lighting effects look the ticket. Expect tons of monsters to slay and 16 levels to negotiate; until then, we'll keep you posted with news of further developments.

[ABOVE] *Shadow Master* is based on the artwork of Rodney Matthews.

[ABOVE] It looks like a cross between *Tunnel B1* and *Disruptor* from Interplay.

[ABOVE] You control a heavily armoured buggy in *Shadow Master*, so it's a driving game as well!

[ABOVE] Impressive enemies are abundant, and the game plays like a quicker version of *Doom*.

20 Oh yes, it's the biggest game of the year and we've got EXCLUSIVE new shots, information and an interview with the developers. Find out what new costumes Lara slips into, where in the world the new game takes her, and what the quest is all about? And just how different is *Tomb Raider 2* from the first game? Plus we interview the public about the Lara Croft phenomenon. Turn to page 20 now!

GUIDE TO THE GRADES

1 We scrutinise all the games thoroughly, playing each for hours, even days, on end. Then we all get together to discuss the review scores to make sure we get it right. The individual reviewer also nominates their own personal category for each game. Game elements are scored out of ten, and the game is given an overall rating out of 100%. Here's how the scores break down...

90-100 If a game scores this highly it's an essential purchase and receives the PLAY Classic logo as a stamp of approval.

85-89 We recommend these games as they are fun, lasting and value for money.

75-84 A decent, solid and dependable game which offers good value for money and won't disappoint fans of the genre. There are some gameplay flaws, but nothing serious.

50-75 These are average games that may be entertaining but are fundamentally flawed or don't have any lasting appeal.

36-50 Games that should be avoided by everyone except die-hard fans of the genre and masochists.

0-35 Complete tripe. Avoid at all costs! Duly awarded the PLAY Putrid. Yuk!

"The first anniversary of this game is set to be something a little more exciting than a bouquet of flowers and a Chinese meal..."

It brings a tear

to the eye just to remember the joy of *Tomb Raider's* release

towards the end of last year. For many players it was the strongest title in the PlayStation's history, the final proof that a game *can* look totally exquisite and have heavenly gameplay at the same time. We were beginning to think that wasn't possible.

From the totally exceptional level design, to the entire control system and overwhelming ability of the heroine, *Tomb Raider* had 'winner' written all over it. "A true work of genius" exclaimed a thoroughly impressed Damian in issue 14's review, "looks unlike anything that has gone before."

Since then *Tomb Raider* has spent a healthy amount of time atop the software charts, made a publisher rich beyond comprehension, and probably sold a few PlayStations.

Central character Lara Croft has been elevated to stardom, stripped naked on the Internet, featured in big-selling lifestyle magazines, and actress Rhona Mitra has been hired to "be" her. MTV will broadcast a program on the Lara Croft

phenomenon on 23 September. It seems the first anniversary of this greatly successful game is set to be something a little more exciting than a bouquet of flowers and a Chinese meal.

On 19 November 1997, Lara Croft will return in an adventure so vast and incredible that it is almost unimaginable. And we know more about it than anyone else on the planet! Well, with the exception of one or two pasty-skinned coders at Core perhaps.

AFTER THE ARTEFACT

If you were a fan of *Tomb Raider*, and let's face it everyone was, you might be getting bored with the same surroundings by now, grand as they were. Well, Lara's newest archaeological target for retrieval is the Dagger of Xian, which she believes is housed in an emperor's palace inside the Great Wall of China. When she travels there and gets into the chambers of the wall, it becomes obvious that uncovering the dagger isn't going to be as simple as dropping by and picking up the laundry – she'll have to make her way all over the world to piece together the elaborate pattern of clues that will earn her the coveted artefact.

and Tibet will play host to the large-scale puzzles, traps and furious gun battles of *Tomb Raider 2*, and apparently Lara really enjoys a bit of action outdoors. We asked Adrian Smith, Operations Director at Core who is heavily involved with the *TR2*

project, what would be different about these new, external levels?

"Lara will have a lot more freedom to explore. For example, in the Venice level she'll be able to climb out of the windows and onto the

balconies, and she'll even be able to get onto the roofs of many of the buildings to have a better look around."

Climb? Hang on. We remember that from the first game. She can only heave herself up onto nearby platforms and shimmy along sideways, can't she?

"Now she can climb hand-over-hand as well as side-to-side. So instead of looking for ledges to jump up to and making a bee-line for those, she'll have to be looking for hand-holds in the side of cliffs or other objects that look as if they can be scaled. Once she starts to climb up the walls she can move across to the left or to the right to access further areas of the map."

VENOMOUS VIXEN

The possibility of climbing sheer surfaces certainly opens things up plenty, but it isn't the only new move Lara has learned while she's been away. Perhaps the best new feature is the harpoon she now packs on the underwater levels, like the rather breath-taking submerged shipwreck.

It always seemed a bit out of place that, on dry land, Lara was an agile, deadly force that took on opponents of any size with a violent spray of gunfire. But when confronted in the water she could, well, swim off quickly. Now she's a force to be reckoned with in any surroundings, which is probably just as well with some sizeable woman-eating sharks patrolling

[Above] With danger waiting around every corner, it's a good thing you have that sleek new harpoon!

the dingy depths of the ocean.

Another new toy that will affect gameplay somewhat is the hand-held flare which will be tucked away in the inventory this time. Because of the new dynamic lighting used on the levels, it will act like a real flare and have several uses.

Some levels are even based entirely around the intelligent use of the flares, where you are plunged into total darkness and have to make the best possible use of your existing flares to make it to the end. They burn out before long and you only have a limited supply, so you must use tricks like chucking them into the distance or

down into a mysterious hole in the ground to see if it's clear of spikes and ravenous beasts. Thankfully, they work underwater too, so the dangers of the deep aren't quite so terrifying.

CAUTION: WIDE LOAD

An additional product of the game's advanced lighting is what the developers call "real-time lighting." Basically, in the outdoor locations, the sun rises in the morning and sets at night, and you have all the various increments of darkness in between. This means that if you take quite a while to complete a level you might end up in the dark, having to rely on your flares once again even in the streets. So there are benefits to working your way through a level quickly, unlike the original *Tomb Raider* where you could spend any amount of time finding the end.

Discharging the firearms in dimly lit rooms will result in a flash that lights the room for a split second, leading to some very cinematic strobing light and rapid fire situations.

Other changes are smaller, but will be more appreciated the longer you play.

Remember when you were being persued by a huge lion that wanted nothing more than to bite your arms off? When you pressed

the **●** button, Lara would roll forward and turn through 180° in one swift movement, letting you destroy the animal with stereo magnum fire. She can now execute this move while soaring through the air, so you can be more evasive of the enemies and catch a few of them by surprise.

It is also now possible to wade through areas of water that are below head height, so you don't automatically have to swim each time you come into contact with water like before. As part of the effort to improve the overall realism of movement, there will be a smoother transition between walking and running too, as she did tend to suddenly bolt like someone had just mentioned her knickers were on fire!

Of course, to keep in touch with the times, alterations have been made to the physical appearance of the character model, including the first thing that everyone noticed upon seeing the game run – she has a proper pony-tail that swishes around like a real one!

Although it didn't seem like such cause for celebration to us, it does appear to have been the only detail the computer press knew about *Tomb Raider 2* until this article. Anyway, it is a bit nicer than that dirty wad of hair bound in masking tape she used to exhibit.

A couple of alternate costumes have

been designed for the extreme nature of some locations in the game. In Venice Lara will be clad in a smoother version of her trademark body and hotpants, but in the sub-zero freeze of Tibet she would seize up and die without her new fur-lined jacket.

For prolonged underwater exploration.

There's no hiding the fact that when *El Plan*, we're really just a bunch of musical artists. Regardless of the idea [blowing of our noses] among artists in the original *Three Kings*, and the message you must be [imparting in the same words] of our young, we *are* *com*. And the main thing is still: *Dangerous* speech of which *Smells* (*Monkeys*, *Home*, *Beats* etc.) *Unfortunatly*, we do appear to be using a couple of the *Endangered* species, this is mostly because we wanted to incorporate journals that are either *unknown* or *different* *languages*. Although you'll be finding journals such as *Two* is *and* *there* is *text*, we're also incorporating a wide variety of *human* *bands* *two* *two*. On *being*, in *reality*, we don't really *know* of anything more *fun* to do than *blat* a *pair* of *magical* of something *magical* "endangered."

not even Lara's fine set of lungs could hold enough air for her to do what she must around the shipwreck, so she will use the wet suit that comes with a large aqualung to survive. We are told that costume changes take place between levels rather than during. And no, you will not see her make the change!

[ABOVE] She sure was a looker last time, but now Core has rounded off all the pointy bits.

NUCLEAR

SAVE THE WORLD FROM A STEREOTYPICAL MEGALOMANIAC WITH HIS FINGER ON THE BIG RED NUCLEAR BUTTON, IN THE FIFTH AND POTENTIALLY MOST VIOLENT EPISODE OF THE INFAMOUS STRIKE SERIES.

Chopper mad!

That's what Electronic Arts is. After scouring the dune-filled sands of Iraq in *Desert Strike*, we gobbled-down

malaria tablets by the handful for an altogether more humid encounter in *Jungle Strike*. The third episode essentially 'came home' to a more urban environment. And most recently (making its debut on PlayStation), the Russians took a pasting, thanks to some nifty Apache gunship antics in *Soviet Strike*. To find out what EA had up its trigger-happy sleeves this time around, we covertly dropped in on the programmers for a full mission briefing on the eagerly anticipated sequel.

[Above] Take control of the ground-hunting Apache gunship and land it safely in the pad to complete the mission.

ENOLA GAY

Nuclear Strike is a multi-vehicle forced-perspective, all-terrain combat game set in Asia and broken down into individual missions. Fans of the series won't be disappointed to discover that yet another power-hungry madman, this time in the form of Henri Lemonde, is threatening to detonate a recently commandeered tactical nuclear bomb from his Soviet ICBM base, if the rest of the world refuses to accept his warped ambitions.

This frightening scenario is naturally an excuse to showcase an impressive new array of vehicles for the single player to try out over land, sea and air and the programmers are quick to point out what will be at your disposal and how they'll differ.

"We will have over ten new vehicles, including attack helicopters, planes, tanks and boats. The ground vehicles will control very differently from the air vehicles, as well as the sea vehicles. Without going into too much detail and spoiling all the surprises, look for a wide variety of speeds, armour and firepower."

This is encouraging news when you consider half the fun in a new *Strike* game is the fact that you can experiment with new hardware. But will the player be able to put his finger on the big red button and vaporise countless innocents in one big nuclear fry-up?

FAT MAN

Soviet Strike will retain an enhanced version of the photo-realistic, digitised isometric terrain, but we put it to the team that surely this is what contributed to the slightly annoying slowdown witnessed in the previous game.

"*Nuclear Strike* is not a first person shooter. We kept that particular camera angle because of the gameplay. You need to see what you are winning up. You need to see the immediate area around

you at all times and the enemy guys running for their lives. It delivers the best 32-bit terrain on any game machine."

The developers of *Nuclear Strike* claim to have improved the engine used in *Soviet Strike*.

"We're using a unique data streaming technology that allows us to 'stream' the ground graphics off the CD during play. The result of this is we've been able to squeeze out even more efficiencies across the board. You'll see and feel the difference."

LITTLE BOY

Players will also notice more user-friendly controls and instruments too. For example, a local radar map of HUD (to spot any that annoying SA-4 that's heading up your tailpipe!) and a new mission waypoint indicator on the compass should kick into touch all of that flicking between map and main playing arena that plagued *Soviet Strike*.

They're also going to include new targeting highlight cursors and... wait for it... more fireworks than a particularly explosion-filled John Woo film.

"All of the explosions have been completely re-done. They are bigger and badder. All of the pyrotechnics have been re-tooled. Just wait 'till you see a T-55 get blown into the air with secondary explosions. Check out the fall-over guard towers and the ground/water shockwave. Every texture and animation has been re-touched, re-drawn or made completely new."

We had an extensive playtest of *Nuclear Strike* at the E3 show in Atlanta and we conclude that it is more user-friendly than the first game. The new vehicles, in particular the tank, add much needed variety, and it means instead of simply flying

BIG BAD BUGGIES

THERE'LL BE OVER TEN NEW AND EXCITING VEHICLES IN *NUCLEAR STRIKE*. CONQUER YOUR ENEMIES OVER LAND, SEA AND AIR AND GET TO TRY OUT THREE TYPES OF HELICOPTER (SUPER APACHE, SUPER COMMACHE, COBRA), A HARRIER JUMP JET, A TANK (ABRAMS) AND A BOAT (AIRBOAT).

around at a fixed height, you can bulldoze through all the pretty buildings and crush cars at will. Each new vehicle also has a different control system, and this gives you something new to learn every time you load it up.

If all of the suggestions and ideas that the dedicated EA team from California come to fruition, *Nuclear Strike* should prove to be the definitive product as far as the series is concerned. Check out our review soon.

METAL GEAR

MANY IN THE COMPUTER GAMES INDUSTRY HAVE ALREADY ACCEPTED THAT THIS IS GOING TO BE THE BIGGEST AND BEST GAME OF NEXT YEAR, BUT WILL YOU BE SO EASY TO BOWL OVER?

Has it really

been that long? Ten years ago now, the first of two *Metal Gear* games came out for the NES and the peculiar MSX format.

The games were different from the usual platform nonsense and so became popular with the hardcore gamers who had seen everything else. The idea was to actually hide from the enemy using strategy and common sense, instead of running around in circles with two flashing AK-47s.

Who would have guessed that the licence, plot and main characters would be dug up from the videogame cemetery and re-animated to appear in a shocking 32-bit action adventure game a decade later? Konami has decided the time is right, and the PlayStation is the machine to bring *Metal Gear* up-to-date!

In *Metal Gear Solid* caused countless hearts to skip a beat at this year's E3 show in Atlanta. You play as weapons and tactics genius Solid Snake once again. This time you are called out to a warehouse and industrial complex in Alaska, where various nuclear weapons are being stored before they are deactivated as part of the 21st century peace process. A group of terrorists has stormed the complex, and on delivering their demands to the government, they indicate that the name of their squad is Foxhound, an ex-military outfit which Solid Snake used to be a member of.

ESCAPE FROM ALASKA

New Konami coding group KCEJ is producing this dark thriller, and from what we've seen so far they're doing one helluva job. While the most impressive-looking scenes are the action-packed

fights and shooting matches with several on-screen enemies, bear in mind that the original *Metal Gear* idea from all those years ago still stands.

The real gameplay lies in using your surroundings in a clever, strategic manner and stealth just as effectively as the nine millimetre automatic on your hip at times. Tuck yourself under a desk as a guard passes so you don't draw unwanted attention to yourself, or get inside a nearby locker, or the warehouse's ventilation system! If you are discovered, not only will the terrorists hurt you, but they will call for help, leaving only seconds to think before you become inescapably surrounded by armed, angry, meaty blokes.

The viewpoint shifts around radically in *Metal Gear Solid*, with a lot of the basic running from point to point seen from almost directly above, then some *Resident Evil*-style camera direction for building the tension towards a John Woo-

quality shoot-out. The game is even capable of switching to first person view, which is handy for many things, including the Infra Red goggles required to see where Liquid Snake has set up laser beams in one corridor that trigger a trap. The game is full of these film influences, like when you tune into the terrorist radio communications for a tactical advantage, just like *Die Hard*.

MGS is absolutely gorgeous to watch when it's running, with such smooth action, sharp graphics and realistic light sourcing that this could have been *Tomb Raider 2*'s only plausible competition – if it wasn't due for Japanese release in March of 1998 and British release months later in the summer!

TEST DRIVE

UNDER
CONSTRUCTION

YOU'RE ABOUT TO FIND THAT *RAGE RACER* IS NOT THE LAST WORD IN RACING GAMES. GET READY FOR RUSH HOUR...

Hopefully the

screenshots we placed in the news last issue will have got you hot under the collar in anticipation. This is the

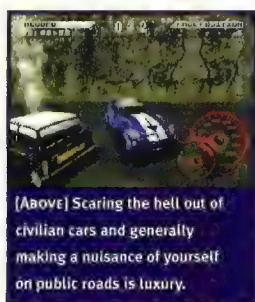

next chapter in the development of the exceptionally promising *Test Drive 4*, and purely with the intent of giving you the best first-hand information available for the game, we have played the latest version to exhaustion!

Although it's due for release in November, Electronic Arts has classified this version of the game as "pre-alpha", meaning there's a long way to go with the coding before it would even reach preview stage. The best part about this news is that, to look at and play, you would never guess that what you were driving was far off from completion, because it's already so damn fast.

With the gorgeous cars on the road, beautifully intricate scenery around you and a distant, believable horizon with minimal pop-up, *Test Drive 4* is breath-takingly quick. Normally one of the problems that developers run into is trying to step up the speed of the game once everything else has been included, but that just isn't going to be an issue with *Test Drive*, which also increases the likelihood that it will be released close to the scheduled time.

CAPTAIN CHAOS

The idea behind *TD4* is to pit the latest spectacular sports cars of modern times against the old classics in an illegal *Cannonball Run*-type contest on public roads (see the boxout for a list

[Above] Scaring the hell out of civilian cars and generally making a nuisance of yourself on public roads is luxury.

The vehicle models are quite exquisite, with perfectly smooth, rounded surfaces in the right areas, something best demonstrated on the curvaceous TVR. And a rare level of graphical detail that shows the real cars haven't just been copied – they've been studied. your way to the next checkpoint.

All this dangerous and despicable behaviour doesn't go unnoticed by the authorities, and in each race you'll find marked police cars ambling along, that engage the siren and give chase as you rocket past doing 150mph in your Dodge Viper. The stereo effect is already very good for hearing where behind you the police or other competitors are; enabling you to block them effectively. This comes in especially handy as there is no mirror or "look back" functions yet implemented.

THE BANDIT

It is most certainly not a simulator, with no ability to get the car up onto two wheels or roll it onto its roof, but there are many touches of realism in *TD4* that help it stand taller than the opposition. Brake lights glow warmly. Thick smoking tyre marks paint the road. Sparks jump in the air from cars grinding against each other. Badly damaged vehicles catch fire, and police drivers lose their nerve when they try to follow in high pressure high speed pursuits.

The most surprising thing is that nobody had heard of *Test Drive 4* a short time ago, and out of nowhere comes a stunning early build of the code that makes you stop and think that the well known racing giants could suddenly have a major fight on their hands.

[Above] It is incredible to see that *Test Drive 4* moves at such speed, even when some detailed scenery surrounds the road.

WARHAMMER

IF THE THOUGHT OF **SCREAMING YOUR HEAD OFF**, CHARGING DOWN A HILL BRANDISHING A **WHOPPING GREAT SWORD**, AND GLEEFULLY **HACKING CHUNKS OUT** OF AN OPPOSING ARMY SOUNDS APPEALING, THEN **THIS IS FOR YOU...**

It's war! Once again

it's time for people with far too much time on their hands

to do battle with orcs goblins, and in this PlayStation sequel to *Shadow of the Horned Rat*, the undead. *Warhammer* was a critical success on PSX, and this very magazine gave it a respectable 82% in issue 14. The only problems seemed to be a definite lack of graphical finesse, and an overly complicated control method; created by necessity of using the same functions as the PC version (which of course has many different keys). PlayStation programmer Andy Kerridge explains...

"As many of the original PC features were kept. What we ended up with was a complex system based around the four buttons on the pad. There were lots of layers, which I had a lot of trouble with. I wanted the PSX version to be accessible. In *Dark Omen*, there's never more than two functions on each button, and the X button is always execute."

The enemies in *Warhammer 2: Dark Omen* have now changed dramatically, and although initially you are fighting the same green warty hordes as in the first game, this soon makes way for an undead army of skeletons, mummies and zombies (who actually climb out of the ground before attacking!). You command a bunch of mercenaries charged with repelling the undead and discovering the source of the evil.

the original has now been replaced with an active cursor which changes depending on the circumstances and which unit you are highlighting, and there's also a neat display panel in the bottom right of the screen which keeps constant tabs on what's happening. It's still not as simple as the point 'n' click action of *C&C*, but it's a step in the right direction, and anyone bogged down with the first game will praise the developers for listening to their comments.

"Great news is that *Dark Omen* will feature a two player link-up mode, which is perfect for this style of game..."

I'M FEELING SUPERSONIC

SUPERSONIC RACERS WAS WARMLY REVIEWED IN PLAY AND EVEN TODAY WE STILL GET TOGETHER FOR A FOUR PLAYER TUSSELE WHEN DEADLINES PERMIT. THERE'S SOMETHING ABOUT THE WAY THE LITTLE CARTOON BUGGIES SWERVE AND SLIDE AROUND THE TIGHT WINDING COURSES, AND THE VAST OPPORTUNITY TO STUFF YOUR MATES OFF CLIFFS, THAT ALWAYS ENDEARS IT TO A PLAY MULTI-PLAYER SESSION.

IT WAS WITH GREAT INTEREST THEN THAT MINDSCAPE TOLD US OF THE SEQUEL, *SUPERSONIC RACERS 2XS*, ARRIVING IN OCTOBER. THE NEW GAME HAS LESS CARTOONY CARS, BUT THE SAME WACKY COURSES. AND FROM THE VERSION WE PLAYED AT MINDSCAPE, THE DEVELOPERS HAVE ALSO WORKED ON IMPROVING THE SENSE OF DEPTH, SO THAT WHAT WAS ONCE FLAT, NOW TAKES ON THE THRILLS OF A ROLLERCOASTER RIDE. 2XS CLAIMS TO HAVE 32 TRACKS AND A HOST OF NEW CARS, AND JUDGING BY THE INORDINATE AMOUNT OF TIME WE SPENT PLAYING IT, INSTEAD OF LOOKING AT *DARK OMEN*, THE FOUR PLAYER MODE REMAINS A WINNER. LOOK FOR A REVIEW SOON IN PLAY.

[Above] Archers are essential to success in *Dark Omen* because they can be miles away but still inflict heavy damage.

2: DARK OMEN

"The control panel gives you all the information you need. The bottom is a muscle bar which allows you to pump up individual units. When fully pumped up they are stronger. The next one above that is the cycle of magic and this shows how many magic points you have and can use per cycle. You can only use certain spells if you have enough magic points."

MONSTER MASH

The first thing to say about the early version we saw at Mindscape's headquarters just outside of Brighton is that the graphics have been improved significantly. Now, you get detailed armies of animated men, lush battlefields of grass, crops and mountains, and proper shading to enable troops to hide from the enemy.

"You can actually see the hills in this version because of the real time shadows, and this helps to enforce the realism. We have also improved the character portraits which come up when you issue a command. In the first game these mini-movies were converted from the PC and were limited by the PCs at the time. The PlayStation ones are 24-bit colour running at 25fps, and they are also in 3-D, which makes them far more lifelike. The characters also now tell you why they cannot do things. Instead of just saying "I cannot," they explain why and this is far more user-friendly."

And it is certainly true that *Dark Omen* is a more accessible game, although we still felt that the control system needed some more playtesting. In particular, the drunken way the camera lurched about if you used the cursor to scroll around the landscape was very off-putting. It is admirable though that so many

independently moving sprites can be on-screen at once with no hint of slowdown. That's more than can be said for C&C.

The other great news is that *Dark Omen* will feature a two player link-up mode, which is perfect for this style of game and gives each player a certain number of units according to the amount of cash allocated, from which they can buy any type of unit.

Warhammer 2: Dark Omen still has about two month's work to go before it is ready for release, but already it surpasses the original in every way. Of course now the superior *Warcraft 2* is out in the shops, but is more simplistic, and the developers of *Dark Omen* hope to win console players back into the fold with the game's great depth and heritage. Look for a review in a few months.

RAPID RACER

 UNDER CONSTRUCTION

FIRST BASKETBALL, THEN PORSCHEs, AND NOW BOATS – JUST WHAT SECRETS HAVE SONY'S INTERNAL DEVELOPMENT TEAM GOT UP THEIR SLEEVES THIS TIME?

White water *Wipeout*.

That's the first thing that goes through your mind when you see Sony's *Rapid Racer* running for the first time. It's *Wipeout* with waves, and you even control your powerboat using the shoulder buttons to ease yourself into the corners. The initial similarities with the Psygnosis sci-fi racer are obvious, but then you realise that the SCEE internal team has programmed *Rapid Racer* entirely in the PlayStation's high resolution mode – and it looks fabulous! Suddenly the Nintendo 64 doesn't look quite as advanced.

Rapid Racer is the first of the two speedboat games we know about (the other being *Powerboat* from Interplay) and it is also the closest to completion. It was one of the games of

the E3 show in Atlanta and since then, Sony has shown us a more complete version which played well and looked even better.

Running at an ultra smooth 50fps on a PAL machine and in high res, *Rapid Racer* hammers across the waves with great aplomb, and although the water effects aren't as impressive as, say *Wave Race* on the N64, later levels introduce ferocious rapids, rocky areas amid raging currents, and even hellish rivers of lava (realism takes a back seat here).

TIED IN KNOTS

Each of the ten speedboats is a well detailed polygon model, and unlike the team's previous

effort, *Porsche Challenge*, they are all different looking, and in some cases even have multiple hulls. The number of courses is set at 18 (which includes night time, mirror and bonus areas), but in a clever twist, the developers have included a random track generator which kicks in once the others have been roundly whipped. This apparently produces up to 256,000 variations of curves, textures and water surfaces, but to be honest – who the hell is going to test that? Surely after the first hundred they are all going to merge into one like the ancient game *Explorer* on the Spectrum 48k, which boasted over a billion levels. It's the quality that counts chaps.

POINTS MEAN PRIZES

Winning isn't just being a champion from your prize, you also get the chance to upgrade your speedboat in many ways. So far we know you can add more boost, engines, propellers and a fuel, but there may be some options for the final version. The more powerful your craft, the more chance you have of battling against the standard versions of the lava course.

[Above] The display on the bottom left shows your turbos and these can be used to power across the rock on the right.

[Above] You can clearly see the wake of the two racers in this shot and your craft will be buffeted by the extra turbulence if you try to slipstream your opponents.

logical progression after a standard racing game such as *Porsche Challenge*. The water effect is good; comprising of patterns which ooze together in groups creating the illusion of a liquid surface. The only problem is that the waves are not that convincing and although the boats 'bob' on the water, you don't get a feeling of powering through huge waves at 50 knots. The best moments though are when you pitch your craft over the edge of a waterfall and then crash to the torrent below. Hopefully many of the levels will have more of these moments to give the sensation of a non-stop Alton Towers theme park ride!

RIVER WILD

The multi-player mode is split screen only (should have been a link-up) which can be played in either horizontal or vertical modes and it works like a dream. Slowdown is a thing of the past, but it should be noted that if you play the game in the

first person mode, you will be sick. I'm not joking.

And what would a racing game be without a thumping soundtrack? *Rapid Racer's* comes courtesy of Apollo 440 who produced exclusive tracks for the game, all of which fit the mood perfectly. No doubt Sony will be releasing this as a separate music CD, or perhaps you will be able to play them through your PlayStation without loading the game as well?

Rapid Racer will have all of Sony's marketing muscle behind it, and looks to be a challenging game which actually makes use of the currents in the water to give you better racing lines. From a short playtest we give *RR* the thumbs up. But will PlayStation owners thirsting for *Rage Racer 2* or *Wipeout 3097* make do with a slower water-bound alternative? Join us for the full review soon.

ABSOLUTE POWER

RAPID RACER CONTAINS TEN POWERBOATS, EACH WITH DIFFERENT POWER AND HANDLING SETTINGS, AND LINE POWERED CHALLENGES. EACH HAS ITS OWN DISTINCT CHARACTER WHICH INFLUENCES THEIR BEHAVIOUR IN THE RACE. THERE IS EVEN TALK OF BEING ABLE TO SAVE YOUR CHARACTERS FROM *PORSCHE CHALLENGE*, AND THEN LOAD THEM INTO *RAPID RACER*.

[Above] Later levels introduce huge rapids and walls of water that can induce sea sickness if you play *Rapid Racer* in the first person mode.

[Above] By using the shoulder buttons, you can ease your boat into the right angle for a swift exit of this sweeping right hander. Just like *Wipeout 2097*!

[Above] The vertical split screen mode allows you to see further in the distance, but we prefer the horizontal mode. There is no slowdown in either mode though.

STREET FIGHTER

WHAT, ANOTHER *STREET FIGHTER* GAME? WE'VE HAD *II*, *TURBO*, *SUPER*, *ZERO*, *ALPHA* AND *III*. SURELY ENOUGH IS ENOUGH? NOPE – YOU AIN'T SEEN NOTHING YET!

There's a small black spot on my left thumb. A little circle of bruised and probably rotting flesh which is evidence of a recent battering. You know what? I don't care. That circle of necrotic tissue means only one thing. There's a new *Street Fighter* game on the PlayStation, and those raised corners on the D-pad are going to make everyone suffer!

In keeping with the tradition of recent *Street Fighter* games, it's got a stupidly long title – *Street Fighter EX Plus Alpha*. (The 'alpha' part of the title is actually the ancient Greek character, but I couldn't find the 'long dead language' button on my computer). By the time you've read all of the title the game's loaded, and it's instantly recognisable as a *Street Fighter* game.

Ryu and Ken have prime real estate on the character select screen. Vega (Bison in the non-Japanese versions) is still the big bad guy in stupid shoulder pads. Dragon punches and fireballs are flung with the familiar pad movements. And the more recent additions to the game like

combos and power attacks all work as expected. The twist? This time, it's in 3-D. Welcome to the 20th century, guys!

PSYCHO CRUSHER!

Capcom has resisted transforming its flagship franchise into polygons for a long time; spending its time putting more and more detail and frames of 2-D animation into the series instead.

This habit has now reached mad new heights in the *Street Fighter III* arcade machine, where something as simple as a fireball has as many as 20 frames, and this means that all those Nintendo 64 owners begging for even one decent beat-'em-up on their expensive machine just aren't gonna get *SFIII*, 'cause it'll never fit on a cartridge. Sony 1, Nintendo nil!

Still, there are limits to how far you can take traditional animation, because somebody's got to sit down and draw the buggers, and all those animators are always whingeing on about needing money for food and stuff. Bring the game into 3-D though, and once you've designed the characters, all you need are a couple of backroom guys who basically get to play with digital Action Men until they've got the perfect psycho crusher animation worked out. Sorted!

The great thing about *SF EX* (cool abbreviation) is that if you're already familiar with any of the series, from the first version of *Street Fighter II* onwards, you can get straight into the new game without needing to learn any new moves.

The old characters (Ryu, Ken, Chun Li,

Guile, Zangief and Dhalsim) play pretty much as they always have, with a few minor changes. For instance, Ryu and Ken's hurricane kicks have been toned down a lot, and Chun Li's fireball, which she picked up in *SFII Turbo*, seems to have disappeared (or at least, nobody could pull it off). Apart from that, it's business as usual, so those boring sods who always choose Ken so that they can do non-stop flaming dragon punches are going to get straight into the action.

SONIC BOOM!

There are 19 characters who can be selected to start with and another four who are tantalisingly present on the selection screen but can only be chosen once certain conditions are met (the game can be set

up so that it automatically saves your status to a memory card).

Two of them are 'evil' versions of regular characters, Ryu and Hokuto, and the others are Cycloid-Beta and Cycloid-Omega, respectively a glowing ghost-like figure and a green wireframe of a human fighter. Their existence isn't a mystery as they're right there on the screen and in the manual, but as nobody can read Japanese we don't know how you access them. (Probably by beating the game on the hardest difficulty level - right, that's easy!)

Apart from the four hidden fighters, ten of the contestants in *SF EX* are totally new, though they often fight like characters from older *Street Fighter* games. Skullomania (who looks bloody stupid but is actually pretty hard) shares a lot of moves with old boogeyman Blanka, and Pullum Purna, who probably tastes great with nan bread, is really Cammy in bigger trousers. Gouki (alias Akuma) and Sakura are the only crossovers from the 2-D Alpha series.

Even though they're now in polygon form, the characters are all instantly recognisable. The look is similar to *Tekken 2*; Capcom sacrificing smoothed-off corners to keep the speed as fast as possible. But the blockiness of the fighters is only noticeable in close-ups, and it's not something you have time to think about during a match anyway.

The backgrounds are a bit disappointing, as they don't have the detail usually found in *Street Fighter* games. Unlike *Fighters Megamix* on the Saturn, at least they rotate around the fighters at the same speed as the ground! They do the job though, and a couple of them have neat lighting effects or, in Dark's sewer stage, water on the ground

to splash about in.

SPINNING BIRD KICK!

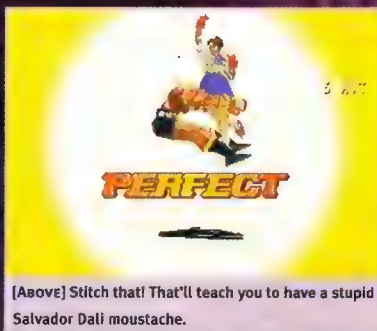

So how does *SF EX* play? The answer is... like *Street Fighter*! The *Street Fighter* series has been around for so long because it played so well to begin with, and *SF EX* doesn't muck about with a winning formula. It urinates on *Mortal Kombat* from a great height, and is still a match for games like *Tekken 2* or Sega's *Virtua Fighter* series.

What's missing from *SF EX* is any real use of the third dimension. Apart from when certain moves like throws and piledrivers are used, the camera just

tracks from side to side with the fighters.

There aren't any 'dodge' moves, and certainly no *Toshinden*-style rolls. *SF EX* is basically a normal 2-D *Street Fighter* game, only with the fighters made from polygons instead of sprites. This is sort of disappointing, because it would have been cool to have an extra way of dodging attacks, but *Street Fighter* games still play so well it doesn't stop it from being huge fun. All the time the game was up on one of the PLAY office PlayStations, people couldn't resist having a 'quick go' and leaving 30 minutes later with bleeding thumbs.

Yes, *Street Fighter* is back, and it's still

EXPLOSIVE R

THE ARCADE SPEED BOMB THAT EARNED A PLAY CLASSIC MANY MOONS AGO HAS BEEN UPDATED. WE ASK IF *BURNING ROAD*'S SEQUEL IS TRULY EXPLOSIVE?

Remember *Burning Road*?

At the time it was

noted mainly for its similarity to Sega arcade and home Saturn title, *Daytona*. It was outrageous and flamboyant; sporting some crazy jumps, vivid colours and cars that took a comical amount of damage to the wheels and axles. Well, it's back, in the form of sequel, *Explosive Racing*, and it has a few surprises up its sleeve.

One of the hardest things to master in *Burning Road* was the almost uncontrollable power slides that you entered after a sharp turn. It was all too easy to flick the tail out and carry on for some distance while facing at 90° to the road. Eventually you would damage a back wheel by grinding it along the wall and this would make you slower.

The bad news is that the very same control system has been dragged out of

DUAL ANALOGUE

[Above] The dangling charm changes in each car – what better than a squidgy eyeball for the black and spooky Mad Max bonus car?

Toka's big drawer of Working Software Routines, dusted off, and hammered firmly into *Explosive Racing*. However, for beginners there is now a rookie control mode, which holds the cars on the road and prevents things from getting out of

hand. But it sticks them to the ground like epoxy cement and makes racing so restrictive and uneventful that you are forced to play in old super-slidey mode to retain the element of surprise.

DYNAMITE

Nobody ever said *Burning Road* was too slow though, and its terrific speed has been successfully recreated here once again. Ever so important for that authentic feeling that makes you believe you are playing on an expensive arcade machine.

The frame rate is high and the movement is smooth. From the familiar, physically accurate charm swinging around inside the car, to the maniac screaming past on his motorbike, *Explosive Racing* has some professional

[Above] On the scrambler bike, the rider hangs one foot off the side to steady himself on bends.

[Above] The Ultimate Road takes you up onto the Giant Wall for a quick spin – just like *Moto Racer*.

LINK-UP?!

SINCE THE PROBLEMS THAT CROPPED UP WITH *V-RALLY*, AND THE UNSETTLING TREND THAT NEARLY EVERY GAME WHICH INCLUDES A LINK-UP MODE ENDS UP WITHOUT THE FEATURE BEFORE OFFICIAL RELEASE, WE'RE BEING CAREFUL WHAT WE SAY ABOUT GAMES THAT INCLUDE LINK SUPPORT. AT THIS TIME, *EXPLOSIVE RACING* DOES HAVE A LINK MODE, AND JM PUBLISHING SET A COMMENDABLE EXAMPLE BY SENDING US TWO IDENTICAL COPIES TO LET US TEST THIS OUT.

IT WORKS ALMOST AS SMOOTHLY AS THE ONE PLAYER GAME, AND IT'S VERY ENTERTAINING TO SMASH YOUR FRIENDS INTO THE WALLS AND SHOUT EXPLETIVES AT THEM FROM ACROSS THE ROOM, BUT WE SIMPLY CANNOT BE SURE THESE DAYS IF IT WILL BE IN THE FINAL VERSION.

[Above] Even in the police cruiser the crazy competitors will slam you right into the side. There's no respect for law enforcement these days.

RACING

SOMETHING OLD SOMETHING NEW

AT A GLANCE, YOU WANT TO KNOW WHAT *EXPLOSIVE RACING* HAS, COMPARED WITH *BURNING ROAD*, ESPECIALLY IF YOU ALREADY OWN THE FIRST GAME. EVERYTHING IN THE "OLD" COLUMN HAS BEEN BORROWED FROM *BURNING ROAD*, EVERYTHING IN THE "NEW" COLUMN IS ENTIRELY NEW TO *EXPLOSIVE RACING*:

graphics. That said, the vehicle models are a bit too plain for some, with large flat polygons and a brash, chunky design, but this is down to personal taste and they are by no means ugly.

With the same controls and similar cars, you could be forgiven for thinking *Explosive Racing* has severely limited longevity, especially for those who have been through the ride once before with *Burning Road*. But the development team has foreseen this and added a few new toys to play with.

TNT

For a start, you now have six vehicles available from the very beginning, three of which are motorbikes! This compares well with the four cars in *Burning Road*, and there are at least three more you can win

[Above] Taking weight and road holding into account, you really don't want to be pitting your little sports car against a truck.

[Above] It's a predefined spin when you smack the edges of the road hard, but it's impressive enough.

and keep. That invigorating cockpit view works with the bikes as well, giving you an individual set of 3-D handle-bars and dials for each one, much like *Moto Racer* which Electronic Arts has yet to release.

Reaching these speeds on the frail frame of a motorbike is an intense experience, and on the chase views you'll even see the driver bend his knee out on the corners like a pro.

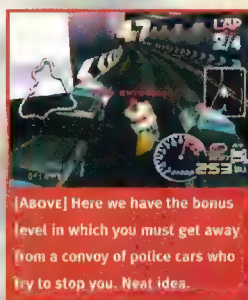

The other most important improvement is the number of tracks, five, which can also be raced in mirror and reverse modes if you keep winning those championships. They are good looking and heavily themed in the most clichéd way. From the huge Loch Ness monster matching your speed at one point on the Scotland track, to a giant snowball rolling through the traffic in Antarctica.

On some of these courses you will notice the daylight turning to darkness as time elapses, and at the prompt of a little icon on the display you can turn on the headlights to illuminate the road ahead! It doesn't really affect the gameplay, but it's fun.

With the new £34.99 price tag, *Explosive Racing* represents value for money if speed is what you're after, but beware – it still plays very like the original *Burning Road* even with all the new bells and whistles.

[Above] It just so happens we have the password that gives you control over a police car... a password that we'll print in next issue's Station Master!

[Above] Here we have the bonus level in which you must get away from a convoy of police cars who try to stop you. Neat idea.

KICK OFF '97

CAN MAXIS RETAIN THE **CLASSIC** PLAYABILITY OF THE **ORIGINAL KICK OFF**, YET GIVE IT ENOUGH **GRAPHICAL POLISH** TO COMPETE WITH THE **CURRENT CROP** OF FOOTBALL GAMES?

The Kick Off name

is synonymous with simplistic yet addictive

gameplay. The first two games were easy to play, but extremely difficult to master. It took weeks of practice to learn how to get to grips with the control system, mainly because the football wasn't attached to the boot of your player.

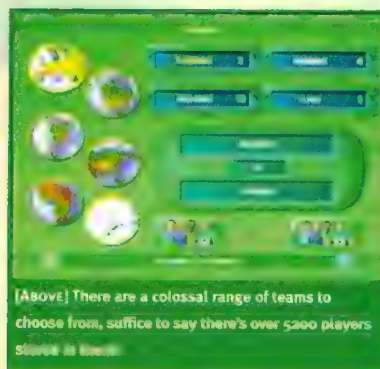

It was quite surprising, therefore, to discover that the latest version is another 'sticky-ball' variant and not a particularly good one at that. The tawdry player movement gets your hackles up straight away and during play there are some painfully long pauses while stray players lethargically makes there way into relevant positions.

The moves themselves are pretty good, which makes the sluggish animations all the more annoying. Back-heels, headers, overhead kicks, long lobs and chips are all present and correct, all of which make good use of the facia buttons on the controller.

It's a bit too easy to hack other players down though and if two or three of your players are near the ball when you attempt a slide tackle, all three will tumble over; looking like some kind of orgy, and take an age to get up again

DUG-OUT

It's not all bad news, however. *Kick Off '97*'s a reasonably fun game if you can forgive the few niggles mentioned above. Neat passes and crosses can easily be

[Above] There are a colossal range of teams to choose from, suffice to say there's over 5200 players spread in them.

[Above] The Argentine striker connects beautifully to the long cross from the winger and bang this in on the volley.

pulled-off and the game flows along at a reasonable pace thanks to a sprint option.

A real plus point is the sheer number of domestic and international teams to choose from. There are international or Premiership sides (all with real names and recent signings), 14 European Championships, 15 European Leagues and countless cups and tournaments too.

There's even an option to customise your very own cups and leagues, which certainly adds to the longevity of the game. At the end of the day, and bearing in mind it has been endorsed by three motion-captured Arsenal stars, this is no *Soccer '97*.

Kick Off '97 just isn't polished enough to stand out from the crowd and consequently, we feel that it may well struggle to compete with some of the recent hot-shots. The faults are all points we brought up at preview stage, and sadly very few have been corrected. Very average indeed.

[Above] The options include: Friendly, Cup and League (both customisable), Practice and a Save Game facility.

SANGOKU MUSOU (DYNASTY WARRIORS)

ONE THING WE ARE **NEVER** SHORT OF WITH THE PLAYSTATION IS **FIGHTING** GAMES, AND **THESE** DAYS THE COMPETITION IS TOUGHER THAN EVER. SO HOW WILL **THIS** BEAT-'EM-UP BABY FARE?

If someone said

you were about to play a game which was a cross between *Tobal 2*

and *Soul Blade*, you could be forgiven for getting a little excited, perhaps even letting a small amount of moisture escape from the corner of your mouth. Well, *Dynasty Warriors* is indeed such a game, although whether or not it deserves such an impressive accolade will become clear.

When the programmers behind *Dynasty Warriors* heard that "retro gaming" was coming back, it seems they got the wrong idea. You see, the whole game takes place in third century China, with a plot based on an ancient Chinese legend about a dispute between three colonies. A few members from each colony have gathered to do battle by way of one-on-one combat, and these are your characters.

WILLPOWER

You get ten theatrically dressed warriors to start out with, and due to the bright, clean high resolution graphics, they look quite stunning. The smallest details on their intricate robes and armour can easily be made out; proving once again the case for more developers to learn this technique and put it into action. The downside of this in *Dynasty Warriors* is that the polygon count has been forced to go down, leaving you with sharply

defined texture maps pasted onto rather angular bodies.

In keeping with the third century China yarn, all the weapons you see and use in the game are from that period in history, and they are quite interesting to get to grips with. The style of fighting is also very different from other beat-'em-ups, but the idea is a bit too ambitious. There

are only two (two!) attack buttons, with the other two symbol buttons being different types of defensive moves.

The point they are trying to make is that in this type of combat, defence and offence both play an equal part. But what really happens is that you are sadly limited in the amount of moves you can perform or just remember. What length of combo could you recall that uses only two buttons? None of the shoulder buttons are used either, so you can't move in true 3-D like *Tobal 2*, towards or away from the camera. A waste of such visually pleasing surroundings.

STAMINA

There are three main types of defence. When both players attack at exactly the same time, you get a spark as the weapons clash and recoil from each other. If you block the other player's thrusting move, where they stab forward at you,

they will stumble past and leave themselves open to attack, and if you block a slashing move then both of you will end up in a parry.

The more spectacular moves and combos are only possible when the "Chi Meter" for your character has reached the top during the beginning of the fight. This signals that he is not at all happy about being constantly smacked around the head. The idea is fine, but the reality is that the best moves are kept from you until your fighter goes haywire and this detracts from the enjoyment of the game somewhat.

Dynasty Warriors is attractive to watch, and its attempt to introduce a new angle to beat-'em-ups is commendable. But sometimes new ideas work and sometimes they don't. *Bushido Blade* is

SALAMANDER DELUXE PACK PLUS

KONAMI JUMPS ON THE INCREASINGLY POPULAR RETRO GAMING BANDWAGON WITH ITS OWN BRAND OF ARCADE ACTION IN THIS THREE-IN-ONE BUNDLE FROM JAPAN.

Salamander rocks!

For a couple of hours anyway. At first glance, this

compilation seems pretty good value; after all, you're getting three games in the bundle, right? Well no, you're not actually.

What you actually get is the original and still highly playable *Salamander*, first seen in the arcades over 11 years ago, and another, identical variant called *Life Force*. The only discernible difference between this and the first game is in the way you manipulate the power-ups. So this doesn't count as another game in our books.

The third, and most visually impressive addition to the series is *Salamander 2*, which is still fresh from the arcades and sports a more garish colour scheme than an Andy Warhol recipe for blamanche!

hoping to beef up your ship with various weapon and ship enhancing pick-ups, such as Multiples, Ripple Lasers, Lasers, Force Fields and Speed Ups.

Pretty run-of-the-mill by today's standards, but this was radical stuff all those years ago. What put *Salamander* ahead of the pack was the excellent learning curve and sweaty-palmed narrow caverns that had to be negotiated. It's still fun even now; trying to work out exactly where to position your ship as the ceiling and floor ominously close in around you. It epitomises the phrase 'getting out of a tight spot', but sometimes the action can get too claustrophobic – especially in the latest version.

The amount of bits and bobs whizzing around the screen is reasonably impressive for this type of game, but when you add all of the explosions, missiles, lasers, ships and the like, it can become just too congested to enjoy. In fact, if it wasn't for the unlimited continues and manner in which you can adjust the amount of lives, the latest version would be nigh-on impossible to finish – such is the difficulty level.

ADDERS

The best way to enjoy *Salamander* is in the

two player mode. Not only do you improve the odds of survival (which are tenuous at best), you can also race for the power-ups and have a no-holds-barred fist fight over why you've managed to amalgamate 20 of them as opposed to your mate's paltry two.

A cool aspect of the gameplay is the way the horizontal blasting action changes to a vertical shoot-'em-up – usually after a fisticuffs with an end of level pulsating 'Mother Brain' or 'Giant Oozing Thingy.' If you've managed to hang

When push comes to shove, *Salamander* is nothing more than an enjoyable relic from a bygone era. You'll like it tremendously, especially the original, but you can't help feeling in the pit of your stomach that £64.99 for a game so dated and simple as this is a bit too much to swallow. Konami has doubts over whether this will ever have a UK release, but if it did, then a £29.99 would be appropriate. Think long and hard before opening your wallet.

THE LOST WORLD

SPIELBERG'S WONDROUS CREATIONS WOWED AN EXPECTANT AUDIENCE THIS SUMMER, BUT HAS EA CREATED A GAME TO MATCH SPIELBERG'S SEQUEL?

Sadly, *The Lost World*

was a huge disappointment.

The film, that is. The special effects were absolutely stunning; they simply couldn't have looked any better. But the shock effect was missing this time around. Who can forget the audible gasps from audiences as a giant brontosaurus nonchalantly reared up and tore a branch from the top of a tree in the first film. This was truly one of the most memorable moments in cinema history, and something the producers could have never re-captured for a cash-in second outing.

JURASSIC LARKS

It's with this cunning link that we come to game itself, which produces a similar effect, but to a lesser extent. The first time you see and take control of the mighty T-Rex, the feeling of fear and excitement is quite astonishing. The way this impressive monstrosity lumbers around the screen devouring raptors and humans alike is one of the most satisfying feelings imaginable, second only to scoffing a donner after five pints of lager.

But, unfortunately, it soon becomes apparent that *The Lost World* is nothing more than a glorified platform romp, with

the added bonus of controlling a few beautifully rendered dinos. Once you've seen them go through their super-smooth hunting, leaping and attacking animations a few times, the novelty begins to wane somewhat.

Gameplay is generally restricted to running from left to right on a pre-defined route until you reach the exit, and occasionally you come across an alternative path. These usually yield a few bonuses, such as health boosts and weapon upgrades if you're playing as one of the human characters, or Instinct

boosts and DNA strands when controlling a dinosaur.

The game is broken down into five enormous stages in which you take control of three dinosaurs and two human characters. The attention to detail in the backgrounds is excellent. Sometimes they can look a little shadowy, but this is due to the fact that a sizeable portion of the action takes place within dank caverns or sparsely-lit mine shafts.

Characters include the tiny scavenging compsognathus, or 'compy' as he's affectionately known, the ferocious veloceraptor (raptor), two types of human (one of them a bonus character) and last, but definitely not least 'Old REXy' himself. And believe us, when this guy takes the centre stage, the earth moves.

DO YOU THINK HE SAURUS?

Playing as the diminutive compy on stage one, life can be pretty tough, especially when raptors, baby T-Rexes and poisonous plants see you as nothing more than a quick snack. The best tactic to employ here is one of avoidance, but note that in the top right corner of the screen is an Instinct Indicator, which increases as you eat more prey. Green denotes weak instincts and strong instincts turn the

[Above] The intro sequence and presentation in general is superb. Even the password selection section is gorgeous.

[Above] By using the time-delay bombs you can kill these raptors with three shots.

[Above] "Look, I don't really want to do this, but it's the kids. They're always so hungry and human entrails are their favourite." And so the mighty Rex ate another fleeing hunter... all in a day's work.

meter red. Keeping the latter topped up ensures that you inflict more damage in a skirmish and predators can't harm you as much.

Progressing to the raptor atones the compy's rather feeble fighting ability with an incredibly aggressive lunge and bite combination which, when mastered, can be used to devastating effect on all manner of prey. There are three types of gameplay controls: one for the compy and raptor, one for the two human characters and lastly a T-Rex specific.

Perhaps unsurprisingly, the human characters look and move rather less convincingly than their dino counterparts. It's blatantly obvious that most of the work has been lavished on their authenticity at the expense of the poor old homo sapiens who move far too slowly.

LEAPING LIZARDS

High praise must be given to the designers and programmers for the uncannily realistic attention to detail heaped upon the dinosaurs. The movement is utterly convincing and to such a degree that you can almost visualise how these beasts must have hunted millions of years ago.

[Above] In order to get through the electrified gate, you must use your head... literally. Kerrunch! There goes the power generator.

[Above] A T-Rex wouldn't be a T-Rex without being able to eat people by the truck-load.

The orchestral soundtrack and effects are superlative as well. Each creature, whether you're controlling it or not, gurgles and hisses in exactly the same way as its silver screen cousin. It's such a shame that such a majestic – looking game offers so little in the gameplay stakes.

Yes, you will love the triumphant and seriously disturbing reverberation of a rampant (and hungry) Tyrannosaurus Rex, but at the end of the day *The Lost World* is a kind of *Pandemonium* with dinosaurs. The camera pans along the path as you scroll left and right, and every now and

again an opponent pops up to block your path (most of the time you can simply leap over them).

Admittedly, the animation, attention to detail, and overall presentation of this game is something to be admired, but the gameplay is sorely lacking, and incredibly simplistic. It's just a platform game underneath all the gloss, and not a very adventurous one at that. Like the film it is very pretty, but leaves you feeling empty and disappointed.

[Above] Every-so-often, you come across an alternative route, which rewards the player with pickups and more enemies of course.

HARD BOILED

AN AWE INSPIRING COMIC SERIES BECOMES A CHEAP SHOOTING GAME. IF FRANK MILLER WAS DEAD, HE'D BE TURNING IN HIS GRAVE!

If you've read

the *Hard Boiled* comic books and you've just bought the licenced PlayStation game of

the same name, you're about to have a very bad day. We've read them. After playing through every level of this game, there isn't a single shred of evidence that the programmers have ever laid eyes on a single copy of Frank Miller's shockingly gruesome action thriller.

The game and comics deal with the same central character, but that is about it for authenticity. Nixon is an android who has been fooled into believing that he leads the ordinary life of a happily married tax collector, when he is in fact an assassin for the company who created him, Willeford Home Appliances.

Mr Willeford himself controls Los Angeles in the dark future where *Hard Boiled* is set, and when Nixon becomes enlightened by other run-away robots he decides to make this fat corrupt dictator sorry. Nixon takes off in his Ford Eastwood car on the journey to Willeford headquarters, but is hampered every step of the way by hundreds of guardian vehicles

[Above] This is one of those moments when you've just been swung round a corner against your will, and here comes a speed warp. Joy.

[Above] Argh! You really don't want to see the explosions close up. They're big and they're blocky.

of all sorts – ground-based and airborne, rocket shooting and flame-spitting.

NEWTON MELROSE

While the original comic story followed Nixon around the crumbling city as he shot hundreds of people with his two enormous handguns, gradually losing skin in a series of massive explosions, the game is based entirely around flying his car. Alarms bells rang.

Movement is severely limited. For example, you cannot stop or turn to fly in the opposite direction, and an invisible boundary keeps you from gaining anything above 40 feet in height or getting as low to the ground as you would sometimes like.

The path of *Hard Boiled* is painfully rigid too, and with the exception of a few key areas where you get to decide which direction is best, you will be forced around tight bends and pulled left and right like a toddler in the rapids. Imagine this kind of

gameplay at an average speed of six or seven miles per hour, until you hit the red speed warps that briefly blast you forward at an uncontrollably high rate.

Your main weapon is a fairly ordinary handgun affair which can be enhanced to shoot in up to four directions at once. The nature of the game with its streams of oncoming enemies and paths cluttered with breakable boxes means you'll want to keep this weapon firing almost all the time, but holding the button down only musters a single shot so you'll have to put up with grinding your thumb cartilage into a

There are a few secondary weapons, the most effective of which are homing blades and missiles that should be kept for bosses or the big mid-level robots that hover around erratically in front of you. There are only two bosses to overcome in the whole game, in differently designed levels where the controls change and you rotate around the mechanical beasts in a circular area.

Two bosses doesn't seem like much until you consider that there are also only five levels in the entire game! They look different enough, but the brain-numbing gameplay remains the same throughout and becomes nothing short of depressing by the time you reach the end. 95% of the time you will be travelling at the standard, almost stationary rate doing nothing more

[ABOVE] To keep from being hurt on the forcefield, line up with the big eye in the middle and shoot for all you're worth.

than trying to press the fire button enough times before the next enemy gets up close.

It's dull, terribly predictable, and the wafer-thin link between the adult comic series and this poor children's shoot-'em-up is contemptible.

"Gameplay at an average speed of six or seven miles per hour!"

THE DEVELOPER CLAIMS THAT THIS GAME WAS "DIRECTLY INSPIRED BY THE HARD BOILED COMIC BOOK FROM FRANK MILLER AND GEOFF DARROW." NOTE THE USE OF THE WORD "DIRECTLY." AS READERS OF THE COMIC WILL KNOW, NIXON'S CAR HAS VERY LITTLE TO DO WITH THE SERIES, BUT YOU SPEND THE ENTIRE GAME FLYING IT. AND IT DIDN'T HAVE ANY WEAPONS ON IT. IN ACTUAL FACT, IT COULDN'T FLY EITHER. HE SIMPLY DRIVES IT, ON THE ROAD, TO WORK ONE MORNING AND GETS IN A SMALL CHASE. GROUNDS FOR A WHOLE LICENCED INACCURATE SHOOTING GAME? WE THINK NOT.

BATTLE ARENA

SONY'S *TOSHINDEN* SERIES BURSTS ONTO THE SCENE ONCE MORE FOR A THIRD INSTALMENT, BUT CAN IT OFFER ANYTHING NEW TO AN INCREASINGLY DEMANDING GENRE?

Jaws dropped,

people had heart attacks and the rest of the PlayStation owning world

watched in amazement as perfectly animated polygonal warriors pounced gracefully around a rotating 3-D arena. Performing outlandish acrobatics and graceful roles in and out of the screen. The original *Battle Arena Toshinden* came out a long time ago and since then the standard of beat-'em-ups has reached almost monumental proportions, but the *Toshinden* series has arguably taken a backwards step instead of breaking new gaming ground.

The third instalment, although bringing the series up-to-date from a graphical perspective thanks to a new 60fps high resolution mode, still fails to ignite the imagination in the same spectacular fashion that *Tobal 2* or *Soul Edge* did. If anything, the characters are slightly jerkier than the second game, due in part to more detail on the gourad-shaded protagonists.

SOUL MAN

Fortunately, *Toshinden 3* harbours a number of new improvements, especially in the control department. Gone are the frankly awkward D-Pad rotating antics in favour of an altogether more palatable button pressing approach for those complicated multi-hit attacks.

Each character has basic *Tekken*-like combos of four or so button presses and

[ABOVE] The graphics are much more colourful than any other game from the series. They look especially good in the 60 fps mode.

by combining them with the D-pad, a plethora of devastating attacks can be unleashed. As in the previous games, when your life gauge is flashing red you can unleash a Desperation Attack and similarly, a special Overdrive Attack when the bar is filled. The Hidden Rage attack has also been retained. For example, doing two dragon punches closely followed by a strong punch allows Eiji to unleash better fireballs.

To add dramatic effect, the background blacks out when any of these moves are performed, but this seems to ruin the continuity somewhat. It would have been more effective to keep the impressive lighting effects more localised within the new enclosed arenas.

A new edition to fighting comes in the form of the Soul Bomb, where a whirlwind of energy emanates from the player and can only be used twice per round. When kicked or punched towards the edge of the level, the Wall Counter allows the player to land out of harms way or perform a deadly counter attack.

Perhaps the best feature, stolen sneakily from the *Tekken* series is the Chain Combo Attack which encourages more experimentation than a mad scientist. A series of pre-determined combo attacks can be pulled off by hitting various buttons accordingly and there are heaps of variants for every character and pressing any strong attack button at the same time as an opponent activates the

At the end of the day, however, and bearing in mind the quite substantial overhaul to the control system, *Toshinden 3* is too little, too late. HERC'S ADVENTURES

LUCASARTS HAS GONE ALL DISNEY ON US WITH AN ARCADE ADVENTURE BASED ON THE SOON-TO-BE-RELEASED ANIMATED FILM.

"Herc's Adventures is a formulaic, albeit colourful adventure..."

LucasArts knows

a thing or two about saving the universe; just look at the *Star Wars*

inspired *Dark Forces* and *Rebel Assault 2* for proof. *Herc's Adventures*, however, brings the action back down to terra firma and appears to be a real departure for the American company.

LucasArts is renowned for its exceptionally playable point 'n' click adventures for the PC, so you'd think that this would be food and drink for the master coders. Evidently not, as *Herc's Adventures* is a formulaic, albeit colourful forced-perspective action adventure adding little to a tried and tested recipe.

Players can choose one of three wholesome characters – based loosely on Greek and Roman mythology. First up is Herc himself, who's predictably the strongest (and slowest). Next is the sultry Atlanta (quick of bow, not particularly strong), and finally, Jason (a pretty good all-rounder). To appeal to a younger audience, the storyline has been kept simple. Players must rescue Persephone, 'Goddess of Fertility' from the vile clutches of Hades who's attempting to create an army of undead warriors and rule Greece.

YE GADS

You can play with either one or two players on-screen at the same time, which makes a change from the lone crusades usually seen in a Disney conversion. The graphics are big, bold and well-animated; many of the adversaries encountered along the way

are particularly entertaining too, such as the cyclopes and laser-spitting wild boars.

The range of weapons is imaginative. For example, Hercules has a club which can be launched like a boomerang against enemies, and later on he can accumulate other weapons from fallen enemies, such as skeleton bones and a fiery-hot chilli breath! Quite often, you have to interact with the scenery, and trees and buildings can be up-rooted and thrown; revealing hidden bonuses.

The main fault with *Herc's Adventures* is in the repetitive nature of the gameplay. Regardless of the rich diversity in backgrounds, you soon realise that the same tactics can be used regardless of the location. Sometimes, the game surprises you by shooting you into the sky and to a new area via a catapult or cannon, but ultimately there is nothing exciting to draw the player on. Average exploration game aimed at younger players obviously.

BATTLE STATIONS

The GAMES TIME FORGOT

It's **ALL HANDS ON DECK** FOR EA'S LIMITED REAL-TIME NAVAL COMBAT SIMULATION.

Written By Tom Sargent

Sound the alarm

and brace yourselves for a head-on collision

"Can hardly be described as a genuine strategy game..."

with an extremely vapid sea fairing naval combat simulator. In recent months it's become increasingly apparent that tactical strategy games are on the increase; both *Warcraft II* and *Transport Tycoon* are testimony to this new trend. But Electronic Arts' latest creation fails to deliver in a number of different categories. What it boils down to is a fairly simplistic head-to-head navel combat simulator with a few strategy pretensions thrown in to try and add substance to an otherwise fatuous game.

Battle Stations places you in command of a fleet of navel vessels on a 50 level Campaign to defeat either a computer or human opponent. There is also an arcade option included (almost as an afterthought), which allows you to select a ship from the eight available and go one-on-one with an enemy craft. Each chosen mission begins at the Strategic Map, where you can view enemy activity, deploy and mobilise your fleet.

SCUTTLE

Ships under your command include Destroyers, Aircraft Carriers, Submarines, Mine Layers and Patrol Boats, which are represented by tiny icons on the map along with a clearly marked target area. You engage the enemy by running into another boat on the Strategic map, whereupon the view changes to a fly-around 3-D view of the two duelling ships.

This scenario is called Battle mode and quite good fun. Two ships circle each other, off-loading their cargo of death until one of them sinks. It is always a fight to the death, with no option to chicken out halfway through. Even if you sink the

[Above] A straggled Destroyer to its death throws on a one way ticket to the bottom of the ocean.

[Above] You can actually avoid many sea battles by dodging around the ships on the Strategic map and going route one with your troops to the target area.

opposing ship, you carry the scars of battle (represented by a depleted power bar) with you to the next encounter.

This game can hardly be described as a genuine strategy game, however, as there's no option to form a convoy and take on multiple targets at once. In fact, in some of the earlier levels you can just dodge around the enemy and deliver your troops to the target destination without any fighting at all.

Battle Stations certainly looks promising at a glance, but probe a little deeper and all that you are left with is an extremely limited one-on-one battleship beat-'em-up game that plays better against a human opponent, but only really tests the speed of your trigger finger rather than the old grey matter.

[Above] Two ships circle each other in the tactical combat mode. It's basically a rush to sink the enemy.

Q&A

Is a game driving you nuts? Has your girlfriend/wife left you, because you simply refuse to leave the screen until you've worked out how to solve what seems like an impossible puzzle or level? Sit back in the instant atmosphere and feed from the fountain of knowledge that is Q&A. Pack up your troubles in the following address: Q&A, Play Magazine, Penguin House, 32 Peter's Road, Bournemouth, Dorset BH6 2JS.

Dear Sir,

I hope you can help me, but concerning Exhumed, According to Ramoth, there's a staff in Karnak Sanctuary after the journey to get the cloning mask, which I managed to get, but I'm unable to find the staff which I presume is the Kilmist Sceptre. I've already got the Amun robes and have got to Set Areas, but I have only one Ankha with a full health bar and cannot defeat Set without more Ankha.
Keith Hall, Staffordshire

Assuming you have found the M-60 in Karnak Sanctuary, and Set and exhaust all your M-60's ammunition into him. Switch to the pistol and Amun Bombs. Just move back and forth whilst peppering him with the M-60, then when he jumps, stop firing and move back. When he lands, start shooting again. As soon as he fires those two-legged things, keep strafing left/right using the Ls and Rs buttons. Use the Amun Bombs to inflict further damage and the pistol to take out the small homing creatures. You don't need the Kilmist Sceptre to kill Set.

Dear Paul,

I used help on Desertblood, before I end up with no hair, bloody knuckles and a nervous twitch. On the third level (B-07), I have got the blowtorch, found the underground bit and got stuck when I couldn't open the underground grill with the blowtorch. I have looked everywhere for another tool, hidden room, or anything at all helpful, but I am more stuck than a beetle-coated nut. Please help.
Steven 'Gagster' Day, Barnsley

What you must do is kneel and inspect the grated floor to see a card beneath it. While still kneeling, use the burner (blowtorch) on the floor to cut a hole. You should now be able to drop into the hole, where the yellow key card can be retrieved.

Dear Paul,

I've got the game Broken Sword and I am stuck in Egypt. I have got the statue with no arms and everything before that. But now I don't know what to do. I've been trying to something for about a month, but instead, I've been working around the square. Please help me. I'm pulling my hair out!
Peter Collins, Exeter

Okay, have you tried using the disc on the broken statuette? Do this, then talk to Duane (fat American in yellow jacket) and sell him the statuette in exchange for a \$50 bill. Now go back to the club and show Umar the photograph. Talk to Umar until he offers to take George to the Bull's Head Hotel, then give him the \$50 bill. This should keep you going for the time being, Peter.

Dear Flux Magazine,

My friend and I swapped a game for Broken Sword and I've been stuck in Ireland for weeks. I've followed the instructions up to the point of reaching the castle gate, but now I'm stuck once more. How do you get pasted that damned goat? Please, please help me.
H Clapham, Cwmbran

Let's solve this goat problem once and for all. It seems that quite a few readers have had trouble getting passed this little grass muncher. Okay, approach the goat to the right of the trough (by left-clicking on the ladder). As soon as the goat knocks you over, click on the ploughshare on the far left. When the goat is trapped, go to the ladder and enter the excavation.

WARCRAFT II

SOLVED

WARCRAFT 2 IS UNDOUBTEDLY ONE OF THE BEST BATTLEFIELD STRATEGY SIMULATIONS CURRENTLY AVAILABLE ON PLAYSTATION, AND THANKS TO SOME SLEEPLESS NIGHTS BASHING ORCS AND SLAUGHTERING HUMANS, WE'RE ABLE TO BRING YOU A COMPACT RESUME OF TOP TIPS AND STRATEGIES WHICH WILL ENSURE A GLORIOUS VICTORY REGARDLESS OF YOUR ALLEGIANCE.

UNITS

There are equivalent and identical unit types for either side. Although the orcs have slightly easier weapons upgrades, the humans have more useful spells later on. Note that battle damage is divided into basic and piercing: the former can be blocked or reduced by enemy armour, but the latter is unaffected.

PEON/PEASANT

Cost: 400 gold
Build Time: 15
HP: 30
Speed: 30
Damage: 3 basic, 2 piercing
Armour: 0
Four sorts are mainly used to collect gold and lumber. They can also build and repair structures. They're rubbish at

fighting, so keep them away from battles.

GRUNT/FOOTMAN

Cost: 600 gold
Build Time: 60
HP: 60
Speed: 15
Damage: 6 basic, 3 piercing
Armour: 2

The big standard foot soldiers won't get next to a unit to attack it. However, they can easily kill enemies by rushing them.

HP: 50

Speed: 25

Damage: 8 basic, 4 piercing

Armour: 4

The fastest and most powerful ground trooper, you need an ogre mounted/stables to cover more. With an altar of stones (if built), they can be upgraded to ogre-mages, paladins (a use magic spells).

CATAPULT/BALLISTA

Cost: 900 gold, 300 lumber
Build Time: 250

HP: 110

Speed: 5

Range: 8

Damage: 80 basic

Armour: 0

These can inflict huge damage on soldiers and buildings. With their superior range, they're great for attacking cannon towers. Keep some troops near them, though, as they're very vulnerable to close-range attack.

DEATH KNIGHT/MAGE

Cost: 1,200 gold

Build Time: 110

HP: 60

Speed: 8

AXETHROWER/ARCHER

Cost: 500 gold, 50 lumber
Build Time: 70

HP: 40

Speed: 10

Range: 6

Damage: 5 basic, 6 piercing

Armour: 0

These can attack enemies from several paces away. However, they're vulnerable to close range attack, so keep your distance. They can be upgraded to berserkers/rangers via the lumber mill.

COST: 2,500 gold
BUILD TIME: 250
HP: 100
SPEED: 14
RANGE: 4
DAMAGE: 16 piercing
ARMOUR: 5
 The most feared offensive units in the game, these can fly quickly in to attack enemies from distance. And they can only be fired on by deathknight/archers, death knights/mages, towers, and destroyers.

OIL TANKER

COST: 400 gold, 200 lumber
BUILD TIME: 50
HP: 90
SPEED: 10
ARMOUR: 10
 Quickly built, these are used to create platforms on oil fields, then fluid the 'black gold' back to base.

DESTROYER

COST: 700 gold, 350 lumber, 700 oil
BUILD TIME: 90
HP: 100
SPEED: 10
RANGE: 4
DAMAGE: 34 basic
ARMOUR: 10
 Although weaker than omnipotent juggernauts/battleships, these only have normal cannon range. They also can't fire at subs unless negated by another unit, but can target airborne enemies.

TRANSPORT

COST: 600 gold, 200 lumber, 500 oil
BUILD TIME: 70
HP: 150
SPEED: 11
ARMOUR: 0
 These are what you need to ferry troops over the water. Each one can carry six units. Very vulnerable to enemy shipping, it's best to escort them to their destination.

JUGGERNAUGHT/BATTLESHIP

COST: 2,000 gold, 500 lumber, 2,000 oil
BUILD TIME: 140
HP: 150
SPEED: 8
RANGE: 6
DAMAGE: 110 basic
ARMOUR: 15
 Powerful floating fortresses, these are more useful than the quicker destroyers. Their only disadvantage is not being able to target airborne enemies, but they can fire 'at the ground' to sink unspotted turtles/subs.

TURTLE/SUBMARINE

COST: 800 gold, 150 lumber, 500 oil
BUILD TIME: 110
HP: 60
SPEED: 7
RANGE: 4
DAMAGE: 50 basic
ARMOUR: 0
 These stealth sea units are invisible to all but towers and flying machines. They can thus sneak up on enemy ships to unleash fire attacks, but are easily sunk if spotted by the enemy.

GENERAL TIPS

- ▶ WHEN BUILDING UP YOUR WORKERS, USE ALL EXISTING ONES TO MINE GOLD (RATHER THAN CHOPPING) TO FUND THEIR TRAINING.
- ▶ TRY TO KEEP A CLEAR PATH BETWEEN YOUR HALL AND GOLDMINE, OTHERWISE WORKERS MAY HAVE TO GO ON A LONG DIVERSION OR EVEN STOP COMPLETELY.
- ▶ TO SPEED UP DELIVERY, BUILD YOUR LUMBER MILL CLOSE TO THE FOREST YOU'RE CHOPPING.
- ▶ AS WELL AS PROVIDING FOOD, FARMS CAN BE BUILT TO FORM DEFENSIVE BARRIERS AROUND YOUR BASE. PLACE TOWERS AND CATAPULTS BEHIND THEM FOR EXTRA PROTECTION.
- ▶ IF YOUR BASE IS PROTECTED BY A LINE OF TREES, TRY NOT TO DESTROY IT WHEN GATHERING WOOD - KEEP AN EYE ON WHERE YOUR WORKERS ARE CHOPPING.
- ▶ IT'S OFTEN WORTH CREATING AT LEAST ONE EXTRA BARRACKS TO PRODUCE MUCH-NEEDED TROOPS QUICKER.
- ▶ CATAPULTS ARE VERY VULNERABLE TO CLOSE-RANGE ATTACK, SO ALWAYS KEEP SOME TROOPS NEAR THEM.
- ▶ THE KEY TO LAND BATTLES IS PICKING OFF ENEMY UNITS ONE BY ONE WITH A GROUP OF SOLDIERS.
- ▶ PLACE YOUR GRUNTS/FOOTMEN IN THE FRONT LINE, PROTECTING YOUR AXE THROWERS/ARCHERS BEHIND.
- ▶ WATCH OUT FOR SOME OF YOUR MEN CHASING RETREATING ENEMIES AND WANDERING INTO THE RANGE OF TOWERS ETC. BRING THEM BACK INTO LINE.
- ▶ USE CATAPULTS TO ATTACK ENEMY TOWERS FROM A SAFE DISTANCE, THANKS TO THEIR SUPERIOR RANGE.
- ▶ SEND SAPPERS INTO LARGE ENEMY GROUPS TO KILL SEVERAL IN ONE BLAST. BUT DON'T SEND MORE THAN ONE IN SIMULTANEOUSLY, AS THE FIRST TO DETONATE WILL KILL THE OTHERS!
- ▶ GET A ZEPPELIN/FLYING MACHINE TO ESCORT YOUR FLEET OF SHIPS AND DETECT ENEMY TURTLES/SUBS.
- ▶ USE A TANKER OR DESTROYER TO LURE ENEMY CATAPULTS/BALLISTAS TO THE SHORE, INTO RANGE OF YOUR JUGGERNAUGHTS/BATTLESHIPS.
- ▶ TO GET THE FIRST HIT ON A TOWER WITH A SHIP, ORDER IT TO MOVE TOWARDS IT RATHER THAN ATTACK. THE TOWER'S SHOT SHOULD MISS, ENABLING YOU TO THEN ATTACK IT.
- ▶ KEEP YOUR SHIPS NEARBY WHEN LANDING TRANSPORTS, TO SUPPORT YOUR TROOPS ONCE UNLOADED.
- ▶ ONE TRICK IS TO PUT A WORKER IN YOUR TRANSPORT LANDING PARTY AND IMMEDIATELY START BUILDING SOMETHING. SOME ENEMIES WILL ATTACK THE STRUCTURE RATHER THAN YOUR MEN, MAKING THE BATTLE EASIER.

SPELLS

D MAGIC ONLY COMES INTO PLAY ON LATER MISSIONS, AS YOU NEED TO BUILD A FORTRESS/CASTLE AND GUARD/CHURCH TO CREATE SPECIALISING UNITS. THESE ONLY FIGHT WITH ONE SPELL - OTHERS MUST BE RESEARCHED. SPELL POINTS USED ARE IN BRACKETS...

TIME CRISIS

IF YOU LIKE YOUR SHOOT-'EM-UPS FAST AND FRANTIC, THEN LOOK NO FURTHER THAN NAMCO'S BRILLIANT *TIME CRISIS*. FOR 80 QUID YOU GET AN IMPORT COPY OF THE GAME PLUS THE ULTRA-COOL GUNCON. OVER THE NEXT FOUR PAGES WE PRESENT A DEFINITIVE GUIDE TO ALL THE TRICKS, CHEATS AND TACTICS THAT WILL HELP YOU RESCUE THE PRESIDENT'S DAUGHTER.

STAGE ONE BOSS

D AFTER BATTLING YOUR WAY THROUGH THE THREE BALL LEVELS IN STAGE ONE, YOU'LL BE CONFRONTED BY THE FIRST BOSS. YOU'VE DRAPPED BEHIND A ROOM WITH DOORS IN CLAM-BUILDING MORGAN. YOUR POSITION IS AN HX TO PICK OFF THE ORANGE GUYS (BLACK ARE SHOTS TWO SHOTS), AND THEN SCATTER HIGH BRITS OVER THE BATH ROOM THAT FORD A

JENSEN (THROW) THEY WILL CONSUME REEF TOWERS FORWARD AT YOU, SO WHEN THEY DO, LOOK BEHIND THE WALL TO AVOID GETTING SCRATCHED. THERE ARE THREE WAVES TO FIGHTING WITH, SO PICK THEM UP QUICKLY AS THEY DROP DOWN AND THEN CONCENTRATE ON THE LAST ORANGE MOON. KILLING HIM WILL MAKE THE COMPLETION OF THE LEVEL.

GENERAL HINTS

• Shoot through the doors. It is possible to shoot at doors and activate frames and his enemies a split-second before they appear (this saving time). To do this effectively, you need to know exactly when and where the enemies are going to appear.

• Firing two shots at each enemy in quick succession will increase your hit percentage and reduce the chances of missing, thus saving more time.

• Always shoot the red guys first as they are the most dangerous. It's very rare that the blue infantry will kill you, so concentrate on the others first.

• Don't duck to reload, so make sure that you remember to do so at regular intervals.

LOOK OUT!

There are several points of interest in *Time Crisis*, so take note of the following before you embark on your treacherous mission.

DANGER OBJECTS

At various points throughout the game, you'll be warned about upcoming

objects that will harm you if precautions aren't taken. Whenever one of these objects is coming, you'll be warned you in advance, as the picture clearly shows.

EXPLOSIVE OBJECTS

Both in Arcade and PlayStation only there are explosive crates scattered around. If these are hit with a succession of shots, they will explode, wiping out a whole wave of enemies in the process. Cool!

BITING THE BULLET

If you don't watch your back, sooner or later you're going to get killed. You begin with three lives, one of which will

D THE MAIN DIFFERENCE BETWEEN THE ARCADE AND PLAYSTATION GAMES IS THAT THERE ARE MULTIPLE ROUTES THROUGH THE HOTEL. YOU STICK TO THE EASY ROUTE AS STANDARD, BUT BY SHOOTING CERTAIN THINGS THAT ACT AS TRIGGERS, YOU CAN UNCOVER HIDDEN ROUTES TO OTHER SECTIONS. THE PATHS WE'VE FOUND ARE HIGHLIGHTED. TAKING THE HIGH ROUTE WILL TAKE YOU THROUGH TO THE HARDEST, BUT BEST ENDINGS.

CRISIS

ARCADE STAGE 1

disappear the moment you see a bullet hole or some other injury etched into the screen.

EXTRA LIVES

Similarly to the coin-op, the player is awarded an extra life when hitting 40 enemies in a row – that's hitting 40 cronies without missing. If you miss, you'll have to start over again. You can score multiple hits on enemies by unloading a few shots into them before they hit the deck and disappear, but this can be construed as being risky. You can also shoot exploding crates and suchlike as they register as hits, but if you fire at any mechanised vehicles such as tanks and choppers, they don't count as hits. On the whole though, attempting to get extra lives just isn't worth the hassle or heartache!

ALTERNATE RELOAD

Plug a standard control pad into port 2 of the PlayStation and then during the game you'll be able to press \square , \times , \circ , or \blacktriangle to duck down and reload instead of the gun button. You can even place it

on the floor and use your foot for added coin-op authenticity!

EASY ARCADE MODE CHEAT

Select the arcade mission from the main selection screen and then, on the next screen that allows you to choose between Time Attack mode or the Story mode, shoot outside of the screen. If the cheat has worked, you'll see the word 'Easy' appear over the Story option. Now select it and start playing and you'll notice that you now have five lives and a lot more time with which to complete the game.

There are two playing modes

STAGE TWO BOSS

IN THIS STAGE, YOU ARE REQUIRED TO PICK OFF TROOPS FROM A LONGER RANGE AND HAVE MANY MORE ATTACKING AT ONCE. IN THE END OF THIS STAGE YOU'VE GOT THE GUN WITH THE 10 SHOTS. HOWEVER, THE WHITE TROOP, ANTI-TRASHMAN, REPS, SHOOTING GARD TROOP IN YOUR PATH. HE WILL EMERGE FROM BEHIND THE PLANT AND SHOOT YOU WITH BLADES. SO TAKE A SHOT AND THEN QUICKLY GO AWAY. LOSING A LIFE, AFTER THREE HITS, TWO CRONES WILL FLY UP FROM BEHIND THE PLANT, SO TAKE ONE HIT THEN GO, AND THEN GO YOUR GUN AT THE OTHER HIT. WHEN HE RE-EMERGES, AFTER THREE CRONES GO AWAY ON SABO, THEY WILL APPEAR AGAIN, SO REPEAT THE SAME PROCESS AS BEFORE. SHOT WILL MOVE OFF BEHIND THE PLANT, SO QUICK REMAIN THE PLANT AND

KEEP TRY TO FIND OUT HIS BLADE'S RANGE. NOW HE'LL BE MOVING UP IN MEN IN WHITE WHO WILL SWARM THE AREA. SHOOTING IS REQUIRED HERE TO PICK THEM ALL OFF AND DON'T FORGET TO DUCK BACK DOWN WHEN TAKING SHOTS FOR THE ONE NEAREST YOURSELF. NOW YOU'RE ONE ON ONE WITH GARD, SO HIT HIM WITH A FEW MORE SHOTS TO MAKE HIM ROBBING FOR COVER ELSEWHERE. THIS TIME, HE'LL COME THROUGH THE DOOR AND APPEAR INTERMITTENTLY TO THROW MORE TROOPS AT YOU. SHOOT HIM AS HE APPEARS AND THEN QUICKLY GO FOR COVER. HE WILL BE BACKED UP BY MACHINE GUN FIRING MEN IN WHITE - THESE ARE EASILY KILLED, SO CONCENTRATE ON GARD. IF YOU SHOOT AND GET SIX IN AN SHOTS HITS, HE'LL DO A SHOOTING HOLLYWOOD SCENE.

In *Time Crisis*, The Arcade game and bonus Playstation game.

THE ARCADE GAME

THIS COMPRISES THE MAIN bulk of this package and your aim is to blast your way through three enormous stages against a very strict time limit in order to save the President's daughter from a gruesome execution.

THE PLAYSTATION GAME

FOR BETTER THAN THE ARCADE GAME, YOUR mission is to infiltrate a multi-storey hotel which is being used as a weapons factory and hunt down the arms supplier, Kantaro, a real nasty bitch whom you'll get to meet at various points.

SECRET ELEMENTS

THE LOBBY

Once you're through to the final area is the lobby, where the lifts are situated. The lift closest to where you're standing will gradually descend and open. The idea is to clear the area of enemies, before the lift shuts and ascends the building again. To do this you must try and memorise where each wave appears from and then take them out quickly before they take cover. Achieve this and you will take the lift up to the Ballroom. Fail and you'll climb the stairs to the Shopping Mall.

THE LOBBY

SHOPPING MALL

SHOPPING MALL

AFTER THE GUNFIGHT AROUND THE SHOP, you'll dive through an air duct in the storage area. Once you get to the final section where there is a crane, you must shoot the glass cabin to blow it up. This will cause the crane arm to fall off and smash a hole in the wall that will provide an alternate route to the Arms Factory. If you fail to shoot the crane, you'll merely go on to the Parking Lot, where a great ending will await you if you complete it.

BALLROOM

AS YOU MAY KNOW, AFTER BATTLING YOUR way through the Ballroom, you will end up facing the Web Spinner Boss. Your aim is to destroy him as quickly as possible - the object being to have about ten seconds left on the clock, after he dies and thus time it so that Kantaro is still in the room with you. If you achieve this, Kantaro will get the

STAGE THREE BOSS

NATURALLY, THE HARDEST STAGE AND ONE WHICH WE RECOMMEND THAT YOU PRACTICE IN TIME ATTACK MODE, AS IT'S DAMNED TOUGH TO COMPLETE. THE FINAL BATTLE TAKES PLACE ON THE ROOFTOP. HOWEVER, THE GIRL TAKES A BULLET IN THE BACK... PAYBACK TIME! WILD DOG WILL APPEAR BEHIND THE FOUNTAIN, SO SHOOT HIM AS HE POPS UP. HE WILL THEN RUN OFF AND COMMAND HIS CRONIES TO ATTACK.

WATCH OUT FOR WHEN HE LOBS GRENADES AT THE STATUES, AS SEGMENTS WILL BREAK OFF AND START ROLLING TOWARDS YOU. FINALLY, WILD DOG WILL DASH OFF INTO THE TOWER AND START FRANTICALLY FIGHTING BACK. A SMOKE SCREEN WILL DISGUISE HIS MOVEMENTS WHILST HE LUNGES AT YOU, SO KEEP WELL HIDDEN AND THEN FIGHT BACK WHEN YOU CATCH A GLIMPSE OF HIM. NOW KILL HIM!

hump and exit to the Swimming Pool via a secret tunnel, closely followed by yourself. If you fail to defeat the boss in time, you'll exit via a hidden tunnel and descend to the Arms Factory.

yourself exiting via the emergency lift, which will take you back down to the Parking Lot culminating in the Poor ending.

ARMS FACTORY

When you reach the final area of the Arms Factory, near the three large storage tanks, kill the men without hitting the tanks. Easier said than done! If you manage to do this, you'll exit via the back door and ascend the building to the Lounge. If you fail and hit the tanks, they will explode, killing everything on the screen and you'll find

GAME OVER:
THE DOWNFALL OF KANTARIS

THERE ARE THREE FINAL STAGES IN WHICH YOU MUST DEFEAT KANTARIS TO FINISH THE GAME. WHICH ONE YOU TACKLE DEPENDS ENTIRELY ON WHICH ROUTE YOU HAVE TAKEN THROUGH THE GAME. THE PARKING LOT IS THE EASIEST, THE LOUNGE IS MEDIUM AND THE HELIPORT IS THE TOUGHEST OF THEM ALL.

EASY (PARKING LOT)

WHEN THE TANK BOSS AND ALL THE BADDIES HAVE BEEN SHOT, YOU'LL SEE A RED CAR SPIN AROUND THE CORNER IN THE BACKGROUND. PUMP IT FULL OF LEAD AND IF YOU MANAGE TO SCORE ENOUGH HITS BEFORE IT DISAPPEARS OFF THE SCREEN, KANTARIS WILL PANIC AND CRASH IT INTO A WALL. IF YOU FAIL, SHE'LL DRIVE AWAY TO SAFETY.

MEDIUM (LOUNGE)

THE IDEA HERE IS TO SHOOT THE THREE LIGHTS IN THE CENTRE OF THE ROBOT AND DO IT AS QUICKLY AS POSSIBLE. IF YOU ARE SUCCESSFUL, THE ROBOT WILL TURN ON IT'S HEELS AND SMASH THROUGH THE BULLET-PROOF GLASS, KNOCKING POOR KANTARIS OUT OF THE WINDOW.

HARD (HELIPORT)

DISPOSE OF THE MAIN GUNSHIP AS QUICKLY AS POSSIBLE, AND THEN KANTARIS WILL MUMBLE SOMETHING AND DASH OFF TO AN AWAITING ESCAPE CHOPPER. FILL IT WITH LEAD AS QUICKLY AS POSSIBLE (ABOUT THREE CLIPS WORTH). IF YOU'RE SUCCESSFUL AND DON'T MISS, THE HELICOPTER WILL VEER OFF AND EXPLODE. FAIL AND SHE'LL FLY AWAY TO SAFETY, TAUNTING YOU.

CRISPY

ROSCO MCQUEEN

Fire! Well that's

the predictable opening out of the way. *Rosco McQueen* is, as you will already know if you

read *PLAY* regularly, Sony's brand new fire-fighting platform game and although we reported on its first public appearance in issue 23, we've now had time to play it for long periods in the comfort of our own living rooms. No Sony reps breathing down our necks and asking our opinion, and most importantly, no developer watching your every facial expression to see if you are in a constant state of bliss. Or not.

The basic idea is that you are the lantern-jawed hero of the title and with the Tower XS building turned into a raging inferno, it's up to you and your floating robot pal, Digit, to douse the flames and rescue any unfortunate civilians trapped in the burning rooms. It goes without saying that if you can save as many valuable boxes of goods as possible you will also get added bonuses.

Rosco McQueen is a *Tomb Raider* style adventure, although it is obviously aimed in the main at younger players – the *Crash Bandicoot* fans. Colours are bright, speech is cute, and the action simplistic, but it's very appealing and instantly pick-up-and-playable.

You basically break into each new room (there are about 10-15 rooms per level) and immediately set upon any robots in the area with your fire axe, because they are the gits who are starting all the

[Above] If you don't stop these robots from reaching the flammable areas of each room, they will plant incendiaries and the whole place will go up. Slash them with your axe, Rosco!

fires. Strategy comes into play as you must choose which droids to intercept according to how close they are to the flammable substances.

Inevitably flames begin to lick around the foundations and then it's time to switch to your hose and drench each section until all the flames are extinguished. As each room is cleared you move closer and closer to the top of the Tower and find out who's controlling all the arsonists.

Rosco McQueen plays like *Excalibur 2555AD*, and any delay between rooms is cleverly disguised by you having to enter a short corridor beforehand. The fire effects are quite superb though, and it really gets scary as you realise that suddenly everything is ablaze around you

[Above] The many lockers in each room hold power-ups aplenty. Here Rosco finds two bottles of water and a box of cereal. Hmm, frosty flakes...

[Above] Touch the survivors and Digit immediately homes in and teleports them away to safety. Well it saves you giving them a fireman's lift.

[Above] Douse the flames before the thermometer at the top right blows its top. If you run out of water, break open a locker.

[Above] Rosco's famous last words. "So you must be the one they call Crusher?"

[Above] Where once a tower of flame stood, now there's only a soggy mess thanks to some handy water bombs found in a secret room. The whole place is instantly drenched.

[Above] "Come Digit, we have work to do." All hell breaks loose in the kitchens as multiple aerosol droids turn those carelessly discarded cardboard boxes full of petroleum into blazing infernos.

[Above] On level two Rosco suddenly comes across a robotic nurse maid determined to give him a napalm enema! Digit stands idly by.

[Above] Later on in the game you come across massive fans which, when activated, send you skyward to collect many hidden bonuses.

and your exit is cut off. Especially when you run out of water and your hand-held torrent becomes a trickle. Needless to say that instead of cumbersome hoses to transport the good old H₂O, you must collect water bottles, and that means every available locker must be pillaged.

So the game looks great, and is crammed with things to do (there's a danger of the same tasks – attack droids, squirt hose – getting repetitive after a while), and to top it all off McQueen himself (a homage to the late Steve surely?) is a humorous Dan Dare-style character with a long list of one liners and all-round appeal. Rosco's certainly an improvement over that damn bandicoot.

Yep, *Rosco McQueen* is shaping up nicely, and with neat touches like Digit, who can teleport survivors instantly whilst giving advice (a bit like Pepo in *Overblood*), it should offer something new for PlayStation gamers. It is also compatible with the analogue joystick, if you've just gone out and bought one. Expect a review

very soon.

STARSTRUCK

COLONY WARS

This must actually be better than flying around and blasting things to bits for real.

Real life doesn't look as good as this, you see. We've been playing a pre-production version of *Colony Wars*, and the space battle is brought to the screen with some of the best graphics to appear on the PlayStation.

Nearby suns glow with a warm luminescence, massive starships cruise over-head, and enemies burn very nicely indeed.

Those Psygnosis boys have been working hard on this one, and we think it will be incredibly popular, not just with the *Wing Commander/Darklight/Elite* fanatics, but also with normal people. This is no niche game.

You have been called in to help crush a rebel threat from humans who live on various planetary colonies. They have started a war to fight for their independence from Earth, and that kind of thing just won't do – they must die for their unpopular political beliefs! 70 missions of excessive military force against these annoying freedom fighters await you, and although the tasks are quite varied, they will inevitably involve you destroying something in space.

TERRAFORMED

Several ships are available to suit the kind of mission you face, and at the moment there are external, cockpit and nosecone views to play in. We found the nosecone camera to be the easiest to use in this version, because the chase view makes it really hard to tell where your shots are going to end up. Most internal views get in the way of the overlaid crosshair when you're chasing a fleeing bandit over the hull of a friendly ship and one wrong shot could get you in trouble.

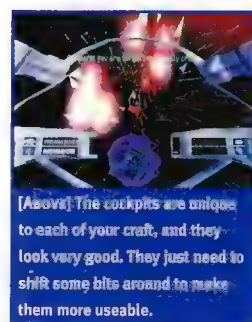

[Above] Once that shield has been weakened with the first set of lasers, it is only a few quick blasts before the ship ignites and explodes.

Some of the things you see in *Colony Wars* are just unbelievably beautiful, with so much attention to detail, from the showering sparks to the huge gelatinous warp hole that there is very little doubt concerning the quality of the finished game, reviewed next issue.

[Above] Buzzing the big ships can be fun, but make sure they're on your side first!

[Above] The cockpits are unique to each of your craft, and they look very good. They just need to shift some bits around to make them more useable.

[Above] If you hold off the game just as an enemy is about to explode, you'll see them flailing around on fire!

[Above] Turning your attack lasers on a civilian transporter may not be the correct thing to do morally, but it is amusing.

FIGHTING FORCE

It's too good to be true! *Fighting Force* seems to have

every essential ingredient for one outrageously playable fighting game. Not only are you given the usual one-on-one arena brawls, but you can choose to stride through an entire town, beating up the morally unguided as you go.

Think of it kind of like the old *Double Dragon* coin-op, but in totally immersive 3-D. Of course, you can take a friend along too for some help with the violence and a rather large (25 stages) arcade experience that sees you travelling through an interesting array of environments. You'll be trashing business offices, trains, gangster-infested back streets and even exploring a few secret islands.

It is the freedom of movement on these detailed stages that causes the jaw to drop of people lucky enough to steal a few moments on the test versions of *Fighting Force*, and the interactivity you have with the set. Simply go anywhere that takes your fancy and kick some texture mapped ass!

STREET RAT

As if the rapid spinning kicks and huge meaty punches weren't enough, there are potential weapons absolutely everywhere. Break the bar off a steel railing and try that baby out over the head of an approaching grunt. If that's too subtle for your tastes, you can even tear the engine from a deserted car and toss it in the direction of anyone you don't like the look of (providing you are using one of the muscled blokes that has that kind of brute strength).

[Above] For that 'one-up' face, the regular fighting mode is provided as well, in a confined ring.

[Above] A quick throw to the back of the head and the big man's little knees are caving in.

[Above] Round and round go flying with a nice blurring head round sweeping kick from Hawk.

[Above] Every little Hawk has a super spinning round kick that can take out several guys in one go.

[Above] This group thinks he can take on the clown lady who was just walking past—be in for a surprise!

DEMOLITION MAN

CAN YOU TELL WHAT HAWK IS THINKING AS HE APPROACHES THE CAR, LARGE WOODEN STICK IN ONE HAND?

THIS NEXT PICTURE WAS TAKEN ONLY A SHORT TIME AFTER! IT LOOKS LIKE SOMEBODY HAD FUN.

[Above] Alana's best move is her hugely powerful rolling back-kick. It sends your adversaries for miles.

[Above] Alana's already proven the hero isn't going to give up that handsome piece of machinery.

Even though everybody is constructed from polygons, you can find yourself being systematically beaten by up to four enemies at any one time without any effect on game speed. Some plain-clothes, harmless-looking bystanders can turn out to hold a grudge that they want to settle as well, so you never know when you're safe and when you're in danger.

As you could tell from our excellent feature in issue 23 where we went to talk to the developers, we think this one is going to be huge! Keep an eye out for the full review next month.

THE NOTE

The problem with

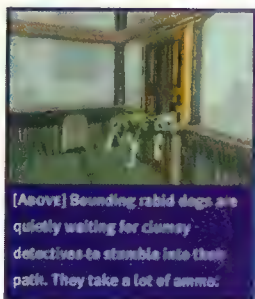

Resident Evil? It was played in the third-person perspective, with static

rendered scenery. While these techniques helped to give the game an artistic, cinematic look, there is one step further you could go to make it even more frightening for the player. *The Note* is like playing *Resident Evil* through the eyes of one of the characters.

Although the plot is more sinister: instead of a fantasy about monsters running around the place howling, shrieking and trying to look scary, you are in search of a group of school children who, having recently been showing an interest in the occult, have been abducted for an as yet unknown purpose. One day they just disappeared, and the only clue that remains is a vague note about a nearby house.

Two investigators locate the dark imposing building and foolishly begin poking around inside. Unlike *Resident Evil*, you don't have to choose whether to be the male or female lead character – they both join into one for the purposes of moving around easily, just like in many role-playing games, including *Suikoden*.

You can walk, strafe and look all over the place, constantly on the lookout for something else that might lead you to the children. The whole view is seen through a single eye, which actually blinks as you stroll around! While it seems like a weird idea, it turns out quite realistic because the eye closes up as you

[Above] Bounding rabid dogs are quietly waiting for clumsy detectives to stumble into their path. They take a lot of ammo.

[Above] The synchronization of the motion, speech and subtitles is muddled at present, but we trust they'll fix that.

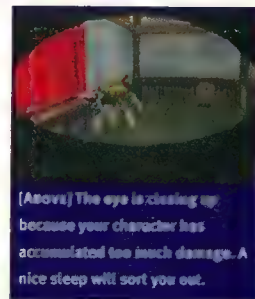

[Above] A mysterious woman who you find in the house says she knows something about the missing children, and asks you to meet her tomorrow...

become tired during the course of a day's snooping; signalling that you need a night's sleep in the local hotel.

Bats, rats, apparitions and rabid dogs are just a few of the first things you'll have to exterminate with your shotgun, but there's no searching around in the dark for ammo here when you can simply go to the shop in town and buy some more. Open drawers, cupboards and even curtains to let in more sunlight, and meet with the spooky people who claim to know what has happened to the children.

The Note looks set to make a change from the usual mindless blasting to an involving action-adventure, aimed at a seemingly more adult audience. The graphics are not particularly special, but there's plenty of atmosphere and it is decent fun to play. Full creepy review as soon as we can get our earthy molesting hands on it.

[Above] The eye is closing up because your character has accumulated too much damage. A nice sleep will sort you out.

[Above] Bats are a nuisance as they flap around your head, nibbling bits off on their way past.

DEAR PLAY,

I purchased *V-Rally* last week and enjoyed it thoroughly because it's a fine game both in one and two player modes. But imagine my disappointment when, after arranging to get together with my friend his PlayStation and his copy of *V-Rally*, we loaded the game on both machines and then spent the next five minutes scouring the menus for link options in the hope of some four player argy-bargy instead of the ultra stable kamikaze computer opponents. No link

options were to be found.

I contacted the helpline on the number found in the *V-Rally* instruction manual and was told "Sorry the link options were not included in the final release, I know all the magazines said they were going to be there but they're not."

This seems like a strange turnaround, as since the start of the advertising campaign and from the information on the web site it was touted as being a major feature?

I don't know how many other

people will be bothered by this, but it seems a great shame that the four player option was removed and I just felt that other people should be warned before splashing out their cash in the hope of four player rallying. Perhaps it'll be included in the sequel. Thanks for the great magazine and keep up the good work.

Paul Needham, e-mail

It was sad indeed, Paul, that Infogrames decided to remove the link, Dual Analogue support and the track editor. And it was even more infuriating that we were not told about it so that we could warn PLAY readers. Instead, all the PlayStation magazines were allowed to mis-inform the public and bear the brunt of the blame. If you are a regular reader then you will have read Ocean and Infogrames' response in issue 24. Yours is just one of many hundreds of complaints by letter and e-mail and this could all have been avoided if we had been kept in the picture.

DEAR PLAY,

I have a friend called Andrew who has a Saturn and was wrongly telling someone that Sega's new system is selling more than

Many of you bought Dual Analogue pads specifically for use with *V-Rally*. Not surprisingly, you are very annoyed that Infogrames took this option out.

PlayStation and that they are the biggest competitor to the N64. He needs re-informing.

I think that PLAY would be better with a demo CD attached to most issues, with demos of the games previewed so that we can find out whether games are worth buying.

Finally, I am thinking about buying a racing game, which one out of these should I get: *Rally Cross*, *V-Rally*, *Total Drivin'*, *Need for Speed 2* or *Rage Racer*? Or should I wait for an F1 game? Simon and James Fitzpatrick, Rickmansworth

Andrew is completely wrong – the Sega Saturn is doing very badly indeed, with the PlayStation and N64 regularly out-selling it 10:1. Sega needs to work out how it

Why was *V-Rally* released without key features which were promised? Paul Needham wants an answer.

managed to throw away the 32-bit market when it was in its grasp and come up with a new machine. Not all of those racing games have been reviewed, Simon and James. We would choose *Rally Cross* over *V-Rally*, *Rage Racer* over *NFS2* (unless you want total realism, in which case *NFS2* rules!) and *Total Drivin'* looks like being a must-have too.

DEAR PLAY BOYS,

I think I read in one of your earlier issues that Sony had a quality test that games had to pass to be released. If it is true, I find it hard to believe, as games like *Crow 2* and *Batman Forever* are being given the right to a life.

Brian Scully, Ireland.

Sony does indeed have an approval process but it is for eradicating bugs and game errors, not for turdy games – that's *our* job. If Acclaim wants to waste a stack of money releasing *Crow 2* which we've said is rubbish right from the start, then that's its privilege. All we can do is offer our opinion as a review and then it's up to the public to decide if they really want the game. You wouldn't believe the number of PlayStation owners who don't read a PSX magazine – it's crazy. It's interesting that both the games you mention are licences of films, because these are traditionally the games which are hurriedly written and hope to sell on the back of the film. Nearly always these games are of poor quality.

DEAR PLAY,

I write to you as a deeply concerned PlayStation owner and PLAY magazine reader. I am deeply unhappy with the lack of support given to the PlayStation's best feature – the link cable. What is going on with Sony? Has it lost its mind? Is it removing this option altogether? Without the link option the PSX immediately loses its edge over the Saturn and N64 and I'm sure Sony will lose its position as the leading console manufacturer.

I bought my PlayStation for the ability to link machines together, thus increasing the longevity of games ten fold – an essential feature when we are still paying £35-45 for new games. Without the link-up ability, strategy and first person perspective games become bland affairs. Just take *Command & Conquer* for an example. A brilliant

game on the PC, but on the PlayStation it's just okay.

The main reason for my writing concerns the number of games that are quoted as having a link option but appear without them! I hear Electronic Arts has just dropped the link option on *Warcraft II*, as have Psygnosis with *Formula 1 '97*. If this is true I might have to reconsider spending £45 on these titles. Other games due to have link-up options include *Overboard*, *Conquest Earth*, *Duke Nukem*, *Quake* and *C&C: Red Alert*. Will these also lose the option? I hope you can relay my fears for the future of the PlayStation. Cheers for listening.

Phil Rose, Oxford.

You are so right, Phil, and many of your concerns mirror our own. *V-Rally* – no link-up. *Mechwarrior 2* – no link-up. *NFS2* – no link-up. *Destruction Derby 2* – no link-up. What the hell is going on? The problem is not hard to understand. Developers spend 18 months working on a new PlayStation game, and yet the link-up option is always the last to be implemented. The deadlines get close, and because it requires some nifty programming to get both machines to work in sync with no slowdown, the option is dropped so that there are no costly delays. Only a tiny fraction of the gamesplaying public actually use this option, according to Sony, and so it is never a high priority. Anyone with half a gamesplaying brain knows that multi-player games are the ultimate. Our colleagues on *Net Gamer* magazine (devoted solely to PC multi-player games) can testify to this, and we regularly play *Formula 1* and *NFS* using two TVs. The message to developers and publishers alike is obvious – more link-up games please!

DEAR PLAY,

What's going on with Nintendo? I used to own a PlayStation last year but had to sell it (cash crisis!). A few weeks ago I thought I would buy myself a new console, so headed into town with the N64 in mind. On arrival at my favourite games shop I was stunned to see the N64's *Killer*

Instinct running next to Sony's *Soul Blade*.

I thought this N64 was supposed to be powerful? *Killer Instinct* had the worst animation I've ever seen, and I don't want to play bloody *Mario*! I am now the proud owner of another PlayStation and a copy of *Soul Blade*.

Simon McGuinness, Newcastle.

It's a myth that just because the Nintendo is brand new, all the games are automatically brilliant. The N64 has its fair share of turkeys, just as the PlayStation had in its early days – in fact more so, because there are so few games in general. *Killer Instinct* may be a coin-op perfect conversion, but the game itself was inherently bad.

DEAR PLAY.

Shame on Marcus O'Kane (issue 23) to say that *NFS2* is worse than the original. I own ten racing games and *NFS2* is my favourite. Oh by the way I also think the tips book names were very funny; named after Bruce Lee films no doubt.

John Donaher, Cork.

Never in the field of racing games, has so much been said about one game by so many.

DEAR OH DEAR!

After reading Marcus O'Kane's letter (issue 23) I felt compelled to write to you. It seems that *NFS2* has

caused a rift to open up. There are those on one side who consider it fantastic, and some that think it is doggy doo! I have noticed this with my friends who

have played it too.

Marcus claims to have liked the original. I did, but did he actually PLAY it, because *NFS* took months to master. As *NFS2* has only been out for a short while it is obvious that Marky boy fits into the category of 'I'll just put this on for five minutes before *Neighbours* starts.' It's annoying to think that developers put so much time and money into a project only to have it thrown back into their face after only a short period of time.

Marcus also claims that the

graphics and pop-up are atrocious. Have you noticed the 360° view, the amazing spot effects, wide range of objects and trackside scenery to crash into and use. The speed of the game is superb considering the amount of detail. My advice is if you want a simplistic game, buy *Scalextric*. If you want a challenging speed-fest, then get *NFS2* – it is worth every penny.

Jim Brooks, Bognor Regis.

Well, there you have it. Like Uma Thurman, some people lust after it, and others think it's an old dog. Personally we love *NFS2* to bits and regularly play it, and *Test Drive 4* looks just as good. Most gamers don't seem to realise that *NFS2* is real!

HELLO PLAY,

In keeping with the rest of the letters you receive, I would like to give you a damn hard pat (Slap or bang, depending on what you prefer!) on the back for producing a top class mag. I would however love to read even more news as I find it very interesting. Thanks mate. Now on to my reason for writing.

I am very excited at the imminent arrival of the Sony Dual Analogue joystick but I am confused as regards a couple of details, so please can you make them clear?

1. Will all PlayStation games work with the joystick or just new games with the appropriate programming. The thought of *Wipeout 2097* with the pad is very nice (Not to mention *DD2!*).

2. In issue 23 you recommended buying an import version of the joystick because of the force feedback, but is it worth it if our PAL games won't be making use of it? And is £40 (Price quoted from issue 23) a tad too expensive when our version of the pad might be available shortly after and maybe for even less dosh?

Well thanks for listening and I hope to be set straight very soon (Issue 24 possibly).

Simon, e-mail

Some incisive points there, Simon. The answer to Dual Analogue game compatibility is not an easy one. Some older games work, some don't. *The Need for Speed 2*, for example, does. Whereas *Rage Racer* does not (probably because

Namco wants you to buy the NegCon instead). The best way to check a prospective purchase is to take your pad to the shop and get them to load up the game. Remember to press the middle button for the red light to get the pad working properly. As regards the price of the pad, well £40 might be more than the official price, but that's what you must pay to be the first on the block with it. By all means buy the official UK one, but you won't get any force feedback if you play import games with it. Not at the moment anyway.

HI THERE

I thought I would drop you a line, as I haven't for a while. Although I buy mostly import games, I was very impressed with the UK version of *V-Rally*. Full-screen, full-speed and no squashed graphics. This game, like many others now, has the screen-adjust utility for centring the screen which I find very useful as I suffer from an offset picture. Can you tell me if Sony is making this mandatory in all games? I've even found it in Namco's Japanese *Rage Racer* and US *Soul Blade*. Brilliant!

I'd like to thank Psygnosis, as I think they were the first to come up with this excellent utility, obviously someone listened to moans about offset pictures. I thank you. Can you also tell me if the Dual

"If Namco was to release a memory add-on, it would solve a lot of problems"

Analogue pad is worth buying for mainly driving games, and does the force feedback work with any game?

Lastly, do you know of any games in development that will utilise software-based interpolation? I.e. smoothing out the pixels for smoother looking graphics. This method is being used for some PC games and because the PSX doesn't have this in-hardware, it would be a good move to keep the console on the cutting edge.

Rascal from Psygnosis might be using this, as reports suggest pixellated-free smooth graphics. I

also like the switch to hi-res graphics with high frame rates. *F1 '97*, *Rapid Racer* etc are all using this and it's very welcome!

Rob Donald, Scotland.

We think it

was Psygnosis who came up the idea as well, Rob Donald, and if anyone knows better, please tell us. The Dual Analogue is not worth it for driving games at the moment, because the two biggest ones: *Rage Racer* and *V-Rally* are incompatible. Many news ones will be though, so perhaps you should wait a bit, especially if you only have a UK machine, because only *Porsche Challenge* works perfectly.

Interpolation is unlikely on the PlayStation because it would have to be software driven. The N64 has this feature built-in as part of the hardware so it doesn't demand too much from the RAM of the console or the game code itself. Even with its hardware though, the N64 still finds it difficult to use too complex textures. Psygnosis is about the best developer for pushing the boundaries of what is possible on the PlayStation, and it seems able to create smoother textures which don't distort on closer inspection.

DEAR PLAY MAGAZINE,

I recently had the pleasure of playing *Tekken 3* at my local arcade. I spent about £15 in one go playing on it and thought it was worth every penny. I can't wait for its PlayStation release. But it troubles me as to

whether it will be as good as the arcade version.

It has been said that Namco will not be able to reproduce the 3-D backgrounds of the arcade due to memory restrictions on the PSX. I know that graphics are a minor consideration compared to gameplay, but the backgrounds do add a lot of atmosphere. There has been talk of an extra memory add-on but after recent speculation it doesn't seem that it is going to happen which I think is a great shame.

If Namco was to release a memory add-on then it would solve a lot of problems. Not only would they be able to convert *Tekken 3* pretty much in all its glory but it would mean that Piracy on the game would be eliminated because you would need the extra memory to be able to run it.

One of the factors that people have been worried about is that it would cost too much, but I'm sure that if they can release *Time Crisis + Lightgun* for £50 (which is how much it is said to cost in this country on release) then they could bundle *Tekken 3* with extra memory for the same price. I think that £50 is a fair price to pay for a game this good and after all we all paid the same price for *Tekken 1* and *2* when they were first released and nobody really complained back then. It would keep a lot of arcade players happy and ensure a perfect conversion of the best fighting game ever. I hope that Namco do the right thing and release the add-on. What do you think?

Stuart Reynolds, e-mail

To be honest, Stuart we all thought *Tekken 3* looked a bit rough compared to the second game and the backgrounds, although impressive, were ruined by the wobbling texture maps on the floor. *Tekken 3* might play well, but is it really any different to *Tekken 2*? We do not think Namco will need a hardware upgrade for *Tekken 3* as it should be perfectly capable of converting it to the PlayStation.

We reserve the right to edit your letters and regret we cannot reply personally. If you want us to print your e-mail address for further electronic discussion, please give specific permission at the end of your letter. Get those letters in now and you too could be one of the lucky few to get in print.

Brian Scully (no relation to Dana) wants to know if Sony has a quality control department because otherwise how do you explain *Crow 2*?

LONG TERM TEST

NAME: DESTRUCTION DERBY2
LENGTH OF TEST: 9 MONTHS
REPLAY VALUE: 3/5

THE BIGGEST FLAW IN *DD2* IS A DISTINCT ABSENCE OF THE TWO PLAYER LINK-UP OPTION WHICH WAS THE BEST THING ABOUT THE FIRST GAME. BIT OF A SHAME THAT, AS THIS WOULD HAVE NO DOUBT ELEVATED IT TO CLASSIC STATUS WHEN IT WAS REVIEWED LAST XMAS. BUT A LOT OF TIME HAS PASSED SINCE *DD2* WAS A BRAND NEW PROSPECT, AND MANY NEW RACING GAMES HAVE EMERGED SINCE. IS IT STILL WORTH THE MONEY, ESPECIALLY AS YOU CAN NOW PICK IT UP SECOND HAND OR AT A DISCOUNTED PRICE? IN A WORD, YES. *DD2* MAY BE A ONE PLAYER GAME ONLY, BUT YOU CAN ALWAYS GO BACK TO IT AND CRUSH A FEW CARS TO PULP, AND THE LONG LASTING ABILITY OF *DD2* MUST BE DOWN TO THE COMPLETELY RANDOM VIOLENCE IT OFFERS. INSTEAD OF JUST COMPLETING A LEVEL BY HAVING TO PERFORM CERTAIN TASKS, TO GET THE HIGHEST POINTS IN *DD2* YOU JUST POINT YOUR CAR IN THE DIRECTION OF SOME ON-COMING HIGH SPEED TRAFFIC AND GRIT YOUR TEETH. THE RESULTS ARE COMPLETELY RANDOM AND DIFFERENT EVERY TIME. CAR HANDLING IS GOOD ENOUGH TO RATE THE GAME FOR DRIVING ENTHUSIASTS, AND IT IS STILL ONE OF THE ONLY GAMES TO OFFER REAL CAR DAMAGE. *DESTRUCTION DERBY 2* IS A GOOD LONG TERM DEAL BECAUSE YOU CAN ALWAYS GO BACK TO IT. THERE ARE PLENTY OF COURSES, LOTS OF FENDER-RIPPING ACTION, BUT IT SHOULD HAVE A TWO PLAYER MODE THOUGH. WORTH A LOOK.

LONG TERM TEST

NAME: PSX DOMINATOR
LENGTH OF TEST: 3 MONTHS
REPLAY VALUE: 4/5

THE DOMINATOR IS THE FIRST THIRD PARTY JOYSTICK FOR THE PLAYSTATION. FORGET SONY'S OWN DOUBLE JOYSTICK - IT SOLD LIKE A DOG AND WAS TOO EXPENSIVE. THIS LITTLE BEAUTY IS WHAT YOU NEED IF YOU ARE IN ANY WAY SERIOUS ABOUT PLAYING FLIGHT SIMS WITH AN SENSE OF REALISM - IN FACT AS AN ANALOGUE DEVICE, IT CAN BE USED FOR JUST ABOUT ANYTHING. THE MAJORITY OF THE DOMINATOR'S TEST TIME WAS SPENT TACKLING JUST ONE GAME - THE MOST UP-TO-DATE FLIGHT SIM ON THE PLAYSTATION - ACE COMBAT 2 BY NAMCO.

HERE IT PERFORMED ADMIRABLY, WITH GOOD ERGONOMICS AND EVEN A TOP HAT CONTROL FOR THE THUMB, WHICH PRESUMABLY COULD BE USED FOR LOOKING LEFT/RIGHT, UP/DOWN IN A GAME IF THIS WAS SPECIALLY PROGRAMMED IN.

THE BUTTONS ALL SEEM FIRM ENOUGH, ALTHOUGH THE STICK ITSELF DOES FEEL A LITTLE BRITTLE, AND HEAVY HANDED PLAYERS WOULD HAVE NO TROUBLE RIPPING IT CLEAN OFF.

THERE IS NO ANALOGUE THROTTLE CONTROL THOUGH WHICH IS A MISTAKE BECAUSE IT MEANS YOU HAVE TO CONSTANTLY HOLD DOWN A BUTTON, RATHER THAN LEAVE IT AT A PRE-SET LEVEL.

YOU DO GET SOME NIFTY TURBO FIRE BUTTONS, WHICH ARE BOUND TO BE USEFUL TO SOMEONE (WE NEVER HAD ANY NEED TO TOUCH THEM THOUGH), AND OVERALL IT'S A GOOD STICK FOR A COMPETITIVE PRICE (£29.99). THERE IS STILL ROOM FOR IMPROVEMENT HOWEVER.

WHAT'S THE STORY... WITH THE YAROZE DEVELOPEMENT SYSTEM?

YAROZE HAS JUST ONE AIM - TO ALLOW ASPIRING PROGRAMMERS TO CREATE WORKING PLAYSTATION GAMES WITHOUT THE NEED FOR A FULL BLOWN DEVELOPMENT SYSTEM OR LICENCE.

IN THE PAST IF YOU WANTED TO BE WORKING ON A PSX GAME YOU HAD TO JOIN ONE OF THE REGISTERED DEVELOPERS. NOT SURPRISINGLY, PLACES WERE IN GREAT DEMAND AND MANY POTENTIAL GEOFF CRAMMONDS FELL BY THE WAYSIDE.

IN THE EARLY EIGHTIES, ALL YOU NEEDED TO WRITE SPECTRUM GAMES WAS THE COMPUTER ITSELF AND A THOROUGH KNOWLEDGE OF THE LANGUAGE. MANY OF THE GREAT NAMES IN DEVELOPMENT TODAY BEGAN ON SUCH FORMATS AND IN THEIR BEDROOMS; CODEMASTERS AND THE DARLING BROTHERS IS ANOTHER EXAMPLE. IF YOU HAD A FERTILE IMAGINATION, YOU COULD DO ANYTHING.

ALL YOU NEED TO SET YOURSELF UP IS THE YAROZE SYSTEM ITSELF; CONSISTING OF A BLACK PLAYSTATION WHICH CAN RUN ANY TYPE OF PSX SOFTWARE, SOME DEVELOPMENT LIBRARIES, AND THE NECESSARY LEADS TO

CONNECT TO A MEDIUM RANGE PC. YOU MUST HAVE A KNOWLEDGE OF C++ ALREADY - ALL THE YAROZE DOES IS TAKE YOUR PROGRAMMING SKILLS AND ALLOW YOU TO DOWNLOAD TO A PSX.

THE COST OF THE YAROZE IS £549.99, AND THE PC, WHICH IS EXTRA, IS ESSENTIAL. YOU CAN PURCHASE THE YAROZE FROM SONY DIRECT, AND THERE'S ALSO AN ON-LINE SERVICE WHICH GIVES YOU FURTHER INFORMATION. YAROZE IS ALSO BEING ADOPTED IN MANY UNIVERSITIES. IF YOU'RE INTERESTED, CALL THE YAROZE TEAM ON +44 (0)171 447 1616.
